Executive Summary

Gaming Arcade is a decentralized web3 gaming platform that offers a comprehensive suite of gaming services for players and game developers alike. The platform has been developed by Zelta Labs LLC, a company incorporated in Saint Vincent and the Grenadines.

One of the key features of Gaming Arcade is its referral system, which allows players to earn rewards by inviting their friends to the platform. The referral system also serves as a way to expand the Gaming Arcade community and create a more engaging and interactive gaming environment. In addition to the referral system, Gaming Arcade also supports the creation and trading of NFTs.

The platform also offers a stake and staking rewards program, allowing players to earn rewards by holding and staking exclusive limited by no. NFTs. This incentivizes players to remain invested in the platform, contributing to a more vibrant and active community.

Gaming Arcade also features a range of hyper casual games, designed to offer quick and engaging gameplay experiences. These games are perfect for players on-the-go, offering a break from the more complex and time-consuming games often found in the gaming world.

For game developers, Gaming Arcade provides a decentralized platform for the management and distribution of their games. The platform allows developers to create, test, and launch their games quickly and efficiently, while also providing valuable insights and analytics to help optimize game performance. Developers can also utilize Gaming Arcade's built-in compliance feature to ensure a fair and secure playing field for all users.

Overall, Gaming Arcade offers a unique and innovative gaming experience that combines the best of web3 technology with engaging gameplay and a supportive community. With its diverse range of features, from NFTs to staking rewards to hyper casual games, the platform offers something for everyone.

Overview

Gaming Arcade is the premier hub of arcade games on the Polygon Chain, catering to avid arcade game enthusiasts. Our cutting-edge platform opens the gateway to the exciting world of web3 gaming, providing an immersive and exhilarating experience for arcade game aficionados.

We're deeply committed to advancing the world of arcade gaming, and our innovative products are a testament to that dedication. Our goal is to bridge the gap between web2 and web3, offering a seamless transition to a new era of arcade gaming.

Gaming Arcade has been on a quest to develop a composable, scalable, and equitable web3 arcade gaming ecosystem since 2021. Our platform offers a thrilling and accessible gaming experience to users worldwide, where they can play their favorite games and earn rewards in a highly competitive environment.

Our company's vision is centered around building a bridge that seamlessly connects web2 and web3, facilitating easy access to this exciting new gaming era for players worldwide. With our appreciation for 90s arcade games, we strive to revitalize them in a fresh and innovative form, unleashing a new wave of arcade gaming. Additionally, we seek to enable web2 gamers to monetize their skills and expertise, fostering a more equitable and sustainable gaming ecosystem for all.

Our company's strategic vision is to establish Gaming Arcade as one of the most beloved and inclusive gaming ecosystems in the world. By fusing traditional gaming with the blockchain universe, we aim to provide a comprehensive platform for both developers and players, enabled by a strong, decentralized technology framework.

We strive to cultivate an ecosystem that values diversity and encourages inclusivity, providing a safe and welcoming space for all players, regardless of their backgrounds or identities. By harnessing the power of blockchain technology, we offer enhanced transparency, security, and fairness in gameplay, ensuring a more trustworthy gaming experience for all.

Our cutting-edge platform also serves as a space for developers to showcase their skills and creativity, offering a wide range of tools and resources to facilitate the creation of unique and innovative games. Our ultimate goal is to empower both developers and players, catalyzing a new era of gaming that is driven by collaboration, diversity, and community.

At Gaming Arcade, our top priority is to establish a platform that caters to both web2 players and game developers alike. We take pride in our collaboration with renowned industry professionals and game developers, working hand-in-hand to ensure that our products offer maximum value and an unparalleled gaming experience to our audience.

Our commitment to excellence is evident in every aspect of our platform, which is designed to deliver seamless gameplay and top-tier performance. We strive to provide a diverse selection of games that cater to every gaming preference, ranging from classic arcade titles to cutting-edge, blockchain-based games.

Moreover, our partnership with leading game developers is a testament to our dedication to quality and innovation. Through this collaboration, we ensure that our platform stays at the forefront of the gaming industry, offering the latest and most exciting gaming experiences to our users.

In summary, our mission is to provide a platform that serves both web2 players and game developers, where quality and innovation are the driving force behind everything we do.

History

Gaming Arcade was developed with a vision to revolutionize the gaming industry and bring back the nostalgia of the 90's arcade games. The idea was to bridge the gap between web2 and web3 and empower web2 players by monetizing their skills and expertise.

The founders of Gaming Arcade believed that web2 players had spent countless hours playing games and getting nothing in return but satisfaction. They wanted to change this by creating a platform that would not only provide entertainment but also offer financial rewards. The team aimed to make web2 players more comfortable with the web3 world by providing a simple and user-friendly interface.

The idea of monetizing streamers for streaming and providing a chance for web2 players to earn a stable passive income led to the development of NFTs. These NFTs would provide a source of passive income for users who staked them. This was a unique approach in the gaming industry and provided a new way for players to earn rewards for their skills.

As the team developed the platform, they focused on creating a user-friendly design that would make it easy for users to navigate and access all the features. The platform was designed with different gameplay modules, including 1vs1, 1vsMany, custom room, and open challenges.

This provided users with a variety of options to choose from and ensured that they could play games in a way that suited their preferences.

The referral system was also developed to encourage users to invite their friends and family to the platform. This would not only increase the user base but also provide rewards to users who referred new players to the platform.

Hyper-casual games being the main attraction of the platform, providing users with quick and easy games that they could play during any time. This was another way of providing entertainment to users and ensuring that they had a variety of options to choose from.

In summary, Gaming Arcade was developed with a vision to provide web2 players with a platform to monetize their skills and expertise. The team aimed to bring back the nostalgia of the 90's arcade games and bridge the gap between web2 and web3. With a user-friendly design, different gameplay modules, NFTs, stake and staking rewards, and a referral system, Gaming Arcade aims to revolutionize the gaming industry and provide users with a unique gaming experience.

Vision

In 2021, Gaming Arcade was founded with a clear vision in mind: to create a welcoming web3 gaming platform that not only revives the essence of '90s gaming culture but also empowers web2 players. We understand the special place arcade games hold in everyone's heart, and we are committed to bringing back those cherished memories while also providing opportunities for web2 players to earn with their skills and expertise.

Our platform offers a new source of income for web2 players, creating more than just a sense of satisfaction. With Gaming Arcade, players can monetize their skills and relive their fondest memories of arcade gaming simultaneously. Our platform is not just limited to web2 players; streamers can also benefit from monetizing their streams through our platform, providing a unique opportunity for both players and streamers to earn from their passion for video arcade games and streaming.

We take pride in offering a diverse selection of games, catering to every gaming preference while keeping nostalgia in mind. Our platform is designed to provide a seamless and immersive gaming experience, ensuring that players can enjoy their favorite games without any interruptions.

In addition to the exciting range of games currently on offer, we at Gaming Arcade are thrilled to announce the upcoming launch of open-world and VR games. These new additions will provide players with a fully immersive gaming experience, enabling them to dive into virtual worlds and explore exciting new environments. We are dedicated to staying at the forefront of the latest gaming technology and trends, and we believe that the introduction of open-world and VR games will enhance the overall gaming experience for our players. Our commitment to innovation and our players' satisfaction continues to be our top priority, and we look forward to bringing this new dimension of gaming to our platform.

At Gaming Arcade, we are committed to creating a platform that bridges the gap between web2 and web3 while providing opportunities for players to monetize their skills and relive their fondest arcade gaming memories. We are dedicated to empowering players and streamers alike and creating a gaming ecosystem that is fair, diverse, and accessible to all.

In addition to the aforementioned objectives, one of our core goals at Gaming Arcade is to establish a platform that welcomes game developers and empowers them to showcase their creations to a wider audience. We understand that game developers are integral to the gaming ecosystem, and we seek to create an environment that supports their creativity and innovation.

Our platform is designed to make it easy for game developers to integrate their games and showcase their work to a global audience.

By providing a platform for game developers, we hope to create an ecosystem that fosters creativity, innovation, and collaboration. Our mission is to establish Gaming Arcade as a hub for gaming enthusiasts and game developers alike, ushering in a new era of arcade gaming that is fair, diverse, and inclusive.

Mission

Gaming Arcade transports players back to the golden era of arcade gaming, reviving the excitement and nostalgia of the '90s. Our platform is meticulously designed to cater to web2 players who long for the classic arcade gaming experience, all while earning rewards. With a vast selection of games and diverse gameplay modes, Gaming Arcade has something for everyone.

In the highly competitive 1vs1 mode, players can wager in cryptocurrency (Matic) and put their skills to the test against others. The victor is rewarded with a generous payout of up to 90% of the bet amount. The platform offers an enthralling journey through the history of gaming, with the added bonus of earning rewards while playing.

Gaming Arcade is not just another gaming platform - we are a mission-driven company with a goal to empower gamers and allow them to turn their passion into profit. Our platform is designed to unlock new doors for players to earn rewards and build their reputation in the gaming community. By providing a space for gamers to showcase their skills and expertise through streaming, we are transforming the gaming industry and enabling players to monetize their passion. Whether you're a seasoned pro or a newcomer to the world of gaming, Gaming Arcade offers a unique opportunity for you to thrive and grow, while earning rewards in the process.

Gaming Arcade's mission is to empower gamers and provide them with the ultimate gaming experience. To achieve this goal, we are excited to announce the upcoming launch of VR and Open World games that will transport players to new dimensions of gaming. These new additions will provide users with an unparalleled level of immersion and excitement, further enhancing their overall gaming experience. We understand that our players crave innovation and diversity, which is why we are committed to continuously expanding our range of games and features.

Gaming Arcade is not just a gaming platform; it's a community that values players' skills and dedication while offering a reliable source of income.

We're transforming the way you earn in the gaming industry with our groundbreaking NFTs that offer real-world utility. Our NFTs provide gamers with exclusive benefits such as free tournament entries, in-game items, and a reliable source of passive income. With our innovative revenue-sharing model, you can earn even while you're not playing, giving you the freedom to pursue other interests while still earning. Unlike traditional gaming, our NFTs offer a transferable value that stays with you regardless of the game you're playing, unlocking new earning opportunities and growth potential. Join us in revolutionizing the gaming industry and unlocking your full earning potential with Gaming Arcade!

Road to Decentralization

Gaming Arcade is committed to achieving the Road to Decentralization by transforming into a fully community-driven gaming platform. As a part of this initiative, we plan to introduce a DAO (Decentralized Autonomous Organization) to give our users a say in the decision-making process. By doing so, we will ensure that the interests of our community are aligned with those of the platform. Additionally, we aim to use decentralized data storage to ensure that users have complete control over their data and are not at risk of data breaches.

Smart contracts will also play a significant role in our journey towards decentralization. We will integrate smart contracts into our platform to ensure transparency, efficiency, and security. By doing so, we will eliminate the need for intermediaries, thus reducing costs and increasing the speed of transactions. Smart contracts will also help us create a fair and equitable gaming environment by automating certain processes and ensuring that rules are enforced in a transparent and unbiased manner.

Overall, Gaming Arcade is committed to achieving the Road to Decentralization and creating a gaming platform that is truly community-driven, transparent, and fair. We believe that decentralization is the future of gaming, and we are excited to be at the forefront of this movement.

a) Unleashing the Potential of a Community-Driven Gaming Platform with DAO!

Gaming Arcade's vision is to revolutionize the gaming industry by creating a fully autonomous and decentralized gaming platform. Our platform will be powered by its own infrastructure, aligned with the needs and desires of our community. To achieve this, we are forming the Gaming Arcade DAO, which will give NFT holders a voice in the direction of our organization. We believe that true ownership and control of the gaming ecosystem can be achieved through the power of DAO, and we're excited to pave the way. With the implementation of a robust governance structure, as well as an incentive system that aligns seamlessly with our community's influence and governance, we're ready to create an unparalleled gaming experience for all.

We believe that our community's vision and input are essential to creating a platform that truly reflects their needs and desires. That's why we're committed to introducing and perfecting a process for incorporating community feedback into our platform's development strategy. We'll start with a continuously refined mechanism for polling and discussion, working tirelessly to ensure that our community is fully aligned and highly organized. As a result, the community will be able to efficiently operate the full governance cycle, from idea consideration through collective revision and approval to final implementation. We believe that this collaborative approach will allow us to create a platform that's truly shaped by and for our community, and we're excited to work together towards this goal.

b) Revolutionizing Gaming: The Power of Decentralized Data Storage!

Traditional gaming systems rely on centralized servers, which are controlled by a single entity, such as the game developer. However, this can result in a single point of failure and leave the game susceptible to issues such as data breaches, server downtime, and other performance-related problems, ultimately impacting the user experience.

On the other hand, Gaming Arcade, built on blockchain technology, boasts a decentralized network that provides a host of advantages. With its data stored on a decentralized network, the gaming experience is more secure, transparent, and resilient. Unlike centralized systems, there is no central point of control, which minimizes the risk of data breaches and server downtime, providing our users with a more reliable and stable gaming experience. The decentralized architecture of the network ensures that the system is tamper-proof, and every transaction is transparently recorded on the blockchain, enhancing user trust and confidence in the system.

c) Smart Contracts Powering Gaming Revolution!

At Gaming Arcade, we leverage the full potential of blockchain technology to create a fair and transparent gaming environment for our users. Our use of smart contracts, which are self-executing agreements that automatically execute when certain conditions are met, ensures that all aspects of the game are carried out in a transparent and tamper-proof manner. The smart contracts automate processes such as the distribution of rewards, ensuring that all players are rewarded equitably based on their performance.

Our decentralized platform is the bedrock of our dedication to providing a gaming experience that is based on integrity, fairness, and transparency. By leveraging the power of smart contracts and decentralization, we have created a unique gaming environment where fairness and transparency are integral to every aspect of the game.

Our unwavering commitment to these principles is what sets Gaming Arcade apart from traditional gaming platforms. We are dedicated to delivering an unparalleled gaming experience that is founded on trust and fairness, and we continually strive to improve and enhance our platform to meet the evolving needs of our users.

In summary, the combination of smart contracts and decentralization is the key to our platform's success. Our commitment to transparency and fairness is what sets us apart, and we are proud to offer our users a gaming experience that is built on the foundation of integrity and trust.

Market

The crypto gaming industry had market revenue of US\$321 million in 2020 with around 41.9 million gamers owning crypto. According to News Wagg's research, 38% of them are Millennials aged between 21-38 years old, and they are the biggest group.

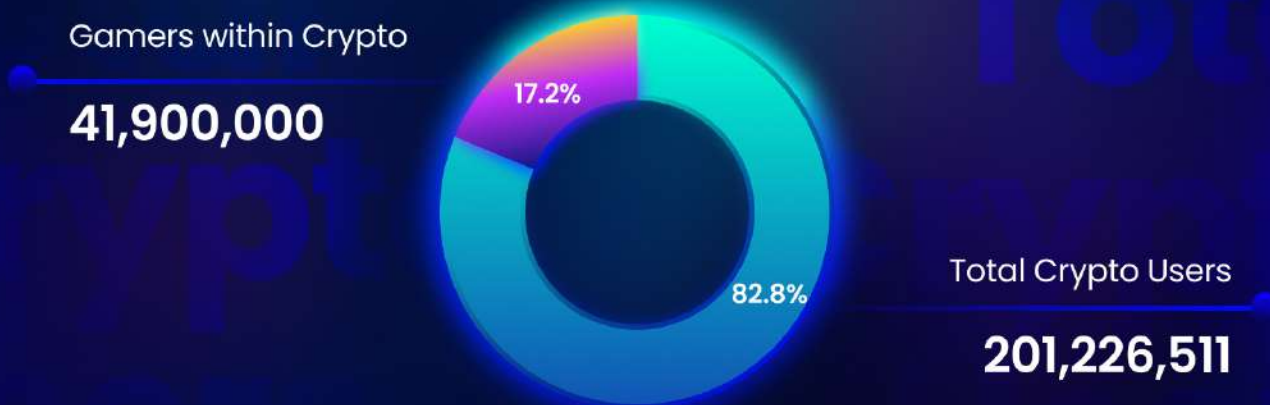

Target Audience

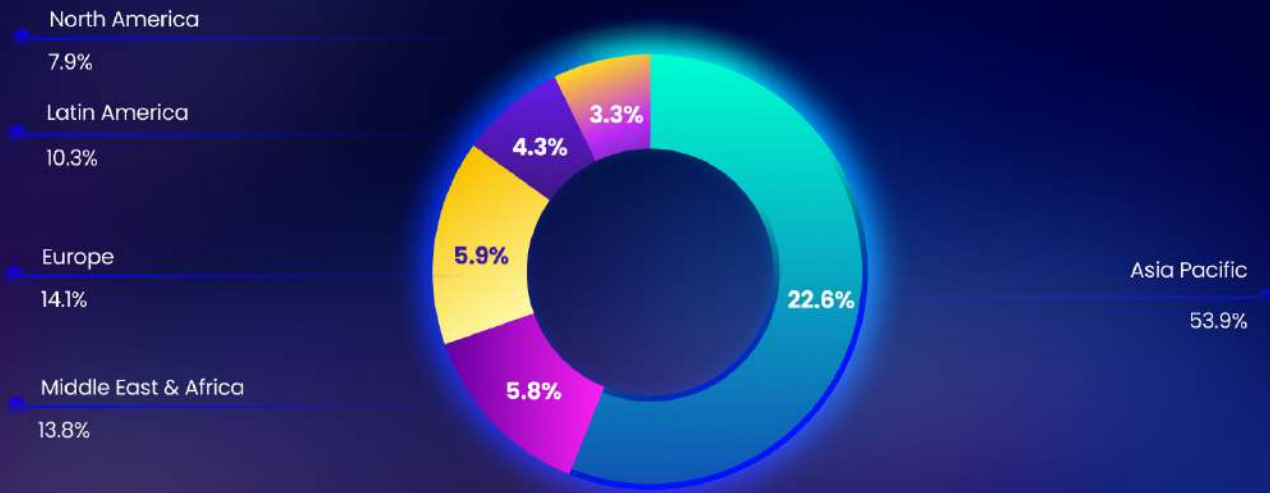

- Youth between 18-24 years
- Web3 Gamers
- Live streamers and podcasts community
- Web2 gamers looking to monetize.

Among the global population of 201,226,511 crypto users, there are 41,900,000 individuals who are both cryptocurrency users and gaming enthusiasts.

Total Crypto Users

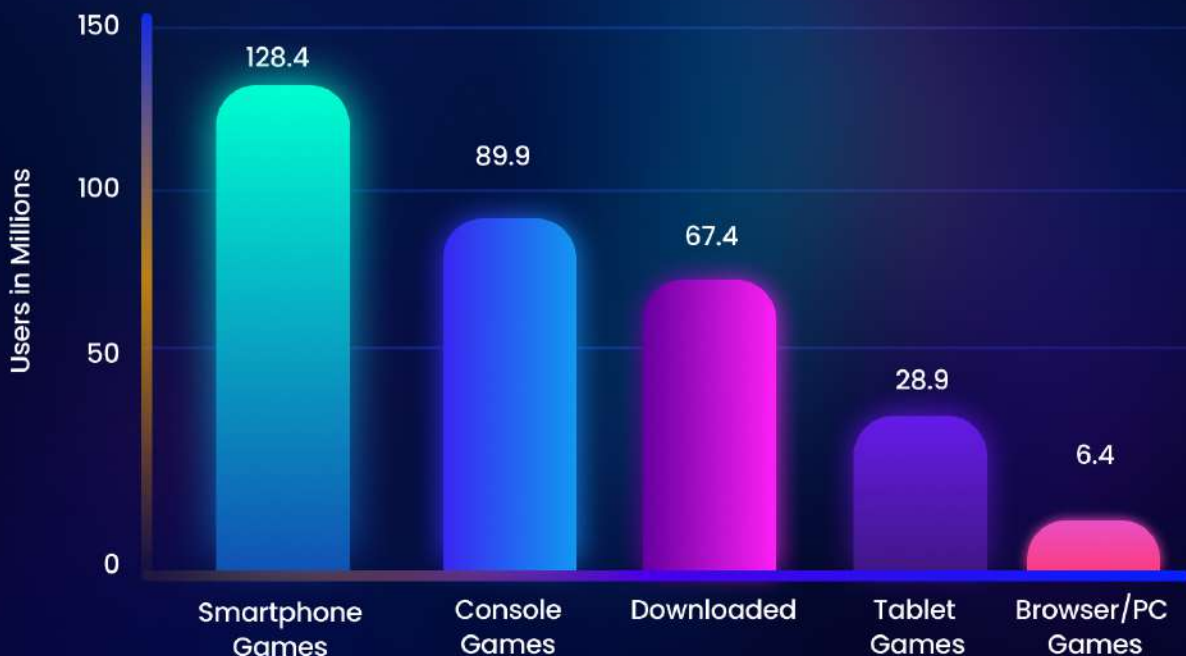

Gamers Holding Crypto (In Millions)

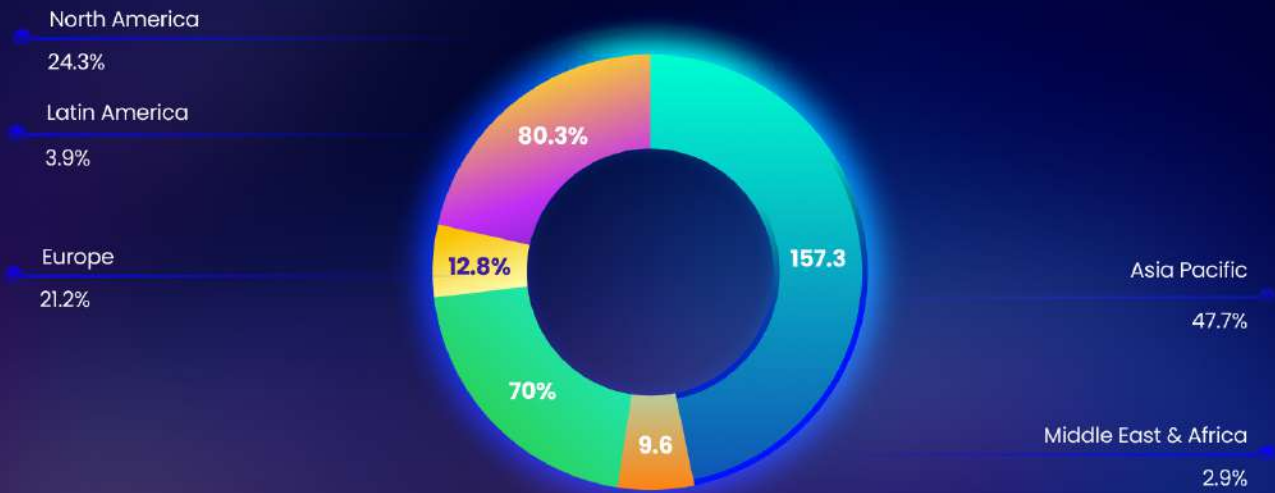

Gamers are also much more likely to own crypto as compared to others- 55% of the Millennials gamers own crypto as compared to just 5% of all Millennials.

There's an immense potential for crypto to be more involved in the gaming industry. Among gamers who own crypto, 80% of them are interested in using cryptocurrency for gaming purchases, and 67% hope there are more opportunities for using cryptocurrency in gaming.

Crypto Gaming Platform Users

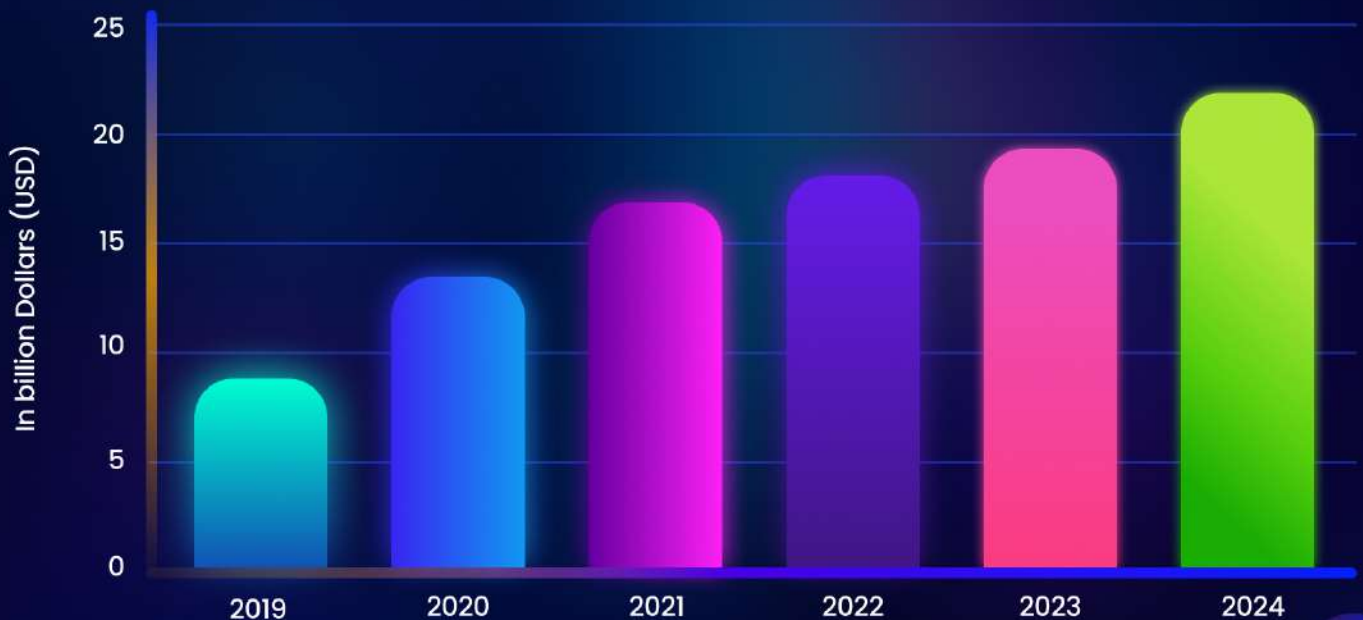

Global Gaming and Crypto Revenue (In Millions)

Hyper Casual Games

Hyper Casual games have been a significant revenue generator in the gaming industry. From US\$8.95B in 2019, revenue rose to US\$12.88B in 2020, and to US\$16.25B in 2021. The trend is expected to continue, with revenue of US\$17.05B in 2022 and projected revenue of US\$19.63B in 2023, and US\$21.8B in 2024.

Revenue generated by Hyper Casual Games

Open World Games

Open world games offer players the freedom to explore a vast virtual world and engage in a variety of activities. This open-ended design provides players with a sense of agency and autonomy, making them increasingly popular. With advancements in gaming technology, open world games have become more sophisticated and attract a broad fanbase, making them a significant and growing segment of the gaming industry.

Number of Sales Copies Sold of Top 5 Games, 2022

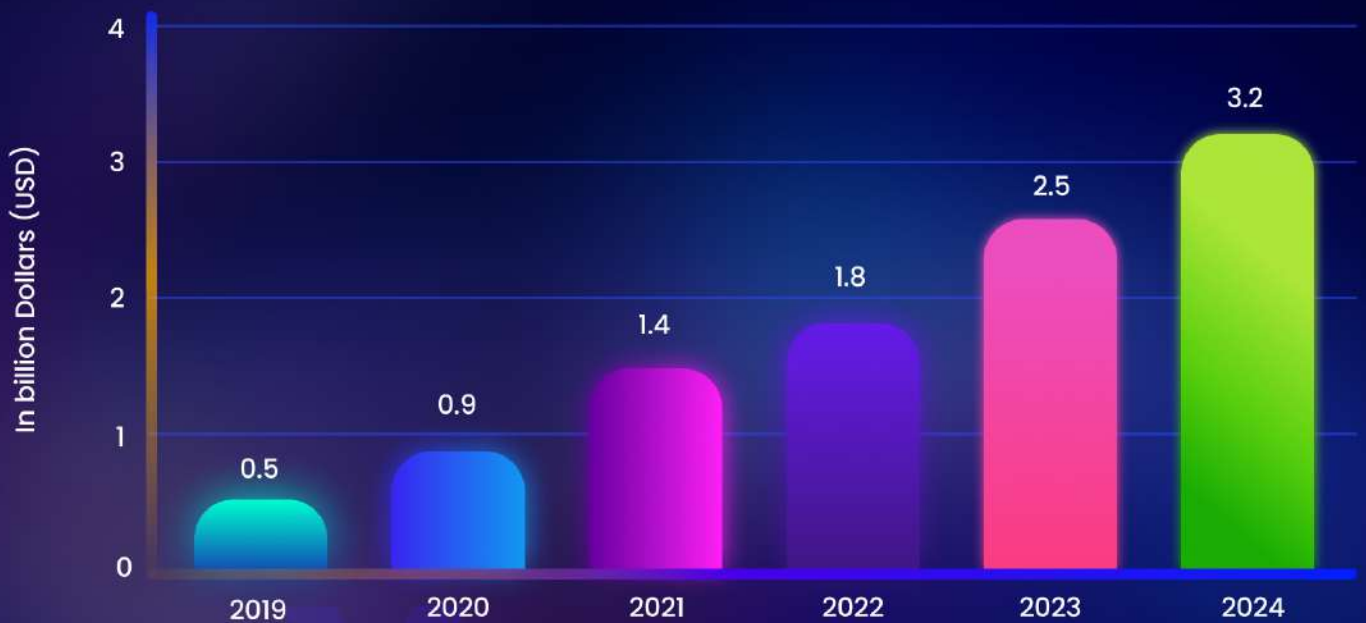

Virtual Reality (VR) Games

Virtual reality (VR) gaming is increasingly popular due to the immersive experience it offers players. VR technology has enabled gamers to step into fully-realized virtual worlds and engage with them in previously impossible ways. The popularity of VR has resulted in a variety of games covering genres like action, adventure, puzzle, and simulation. The industry's growth is driven by the realism and interactivity of VR games, and advancements in technology and affordability of VR headsets are expected to drive further growth.

NFTs

NFTs have revolutionized the value and ownership of digital assets, from art to video games. They provide a new way for creators to monetize their digital content and collectors to purchase unique pieces.

The crypto industry's growth and demand for digital assets have led to an exponential increase in the market size of NFTs, with high-profile sales and collaborations further solidifying their position in the digital economy.

Market Cap of NFTs (2018–2022)

Challenges

a) Discovery of Web3 Gaming

The "discovery of web3 games" might seem like a daunting challenge at first as it involves navigating a complex and rapidly evolving ecosystem. This new paradigm presents a number of challenges that players, developers, and other stakeholders must address. Web3 gaming represents a significant departure from the traditional gaming experiences offered by web2 technologies, and users may be unfamiliar with the concepts and technologies involved.

One challenge the user may face as a web2 user is the technical complexity of web3 gaming. Building and playing web3 games involves working with decentralized blockchain technology, smart contracts, and other decentralized protocols that may be unfamiliar to the user. Additionally, web3 gaming often requires managing digital assets like tokens or NFTs, which can be a new experience for web2 gamers.

Another challenge the user may face is understanding the potential benefits and use cases of web3 gaming. The decentralized nature of web3 gaming allows for new levels of player ownership and control, which can lead to more immersive and rewarding gaming experiences. However, the benefits of web3 gaming may not be immediately apparent to web2 gamers, who may be accustomed to more centralized gaming experiences.

Finally, users may encounter challenges related to adoption and community building. Web3 gaming is still a relatively niche market, and building a thriving ecosystem will require the support of a community of developers, investors, and players. As a web2 user, users may not have existing connections or networks within the web3 gaming community, making it harder to get involved.

b) Interoperability

Going multi-chain presents a significant challenge for the web3 gaming industry due to a number of technical and economic factors. One of the biggest challenges of going multi-chain is the complexity of working with multiple blockchain protocols. Each blockchain has its own unique set of features, limitations, and requirements, and developing games that can operate seamlessly across multiple chains can be technically challenging. Additionally, maintaining and updating multiple versions of a game to support multiple chains can be time-consuming and resource-intensive.

Another challenge is the potential fragmentation of the player base. With games operating on multiple chains, players may need to hold and manage multiple types of tokens and assets across multiple wallets and exchanges, creating a fragmented user experience that can be difficult to navigate. This can create a barrier to entry for new players and make it harder for games to build large and engaged communities.

Economic factors also come into play when going multi-chain. Each blockchain may have its own unique token or currency, and managing liquidity across multiple chains can be a challenge. Additionally, operating on multiple chains may require developers to pay transaction fees and other costs for each chain, which can add up quickly and impact profitability.

It is challenging to maintain security and compliance across multiple chains. Each blockchain protocol may have its own unique security requirements and regulatory considerations, and developers and operators of multi-chain games must ensure that they are following best practices and complying with all relevant laws and regulations in each jurisdiction.

In essence, going multi-chain presents a complex and multi-faceted challenge for the web3 gaming industry. Developers and operators must navigate technical complexity, potential user fragmentation, economic considerations, and security and compliance challenges to build successful multi-chain games. However, the potential benefits of going multi-chain, such as increased user adoption and liquidity, make it a challenge worth undertaking.

c) Seamless Progression Across Games

Cross game progress is a significant challenge in the context of the web3 ecosystem, as it requires coordination and standardization across multiple games and blockchain protocols.

In traditional gaming ecosystems, progress is often limited to individual games, with no way to transfer progress or assets between games. However, the decentralized and interoperable nature of the web3 ecosystem makes it possible for players to carry their progress and assets across multiple games and blockchain protocols.

One of the main challenges of cross-game progress is establishing and maintaining interoperability between different games and blockchain protocols. This requires establishing common standards and protocols that allow for seamless transfer of assets and progress data between games. Achieving this standardization requires collaboration and coordination across multiple games and blockchain communities, which can be challenging.

Another challenge is ensuring the security and integrity of cross-game progress data. Because progress data and assets are transferred across multiple games and blockchain protocols, ensuring the security and authenticity of this data is crucial. This requires establishing robust security and verification mechanisms, as well as addressing issues related to fraud, theft, and other security concerns.

Additionally, cross-game progress raises economic considerations, as players may be reluctant to invest in assets and progress data that can only be used in a single game. Establishing a market for cross-game assets and progress data requires addressing issues related to liquidity, price discovery, and market regulation.

Finally, cross-game progress requires building a community of players who are interested in and invested in the concept of cross-game progress. This requires educating players about the benefits of cross-game progress, building trust and confidence in the underlying technology, and fostering a culture of collaboration and innovation.

In summary, cross-game progress is a significant challenge in the web3 ecosystem, requiring coordination, standardization, and collaboration across multiple games and blockchain protocols. Addressing technical, economic, and community-building challenges is crucial to realizing the potential of cross-game progress and building a thriving ecosystem of interoperable games and assets.

e) User Acquisition

User acquisition is a significant challenge in the web3 ecosystem, as it requires building a user base for decentralized applications (dApps) and services, which often lack the network effects and marketing channels of centralized applications.

One of the primary challenges of user acquisition in the web3 ecosystem is the lack of awareness and understanding of decentralized technologies among mainstream users. This requires educating potential users about the benefits and features of decentralized applications and addressing misconceptions and concerns about blockchain technology.

Another challenge is the fragmentation of the web3 ecosystem, with numerous blockchain protocols, dApps, and services competing for users' attention and adoption. This can make it challenging for users to discover and navigate the web3 ecosystem, and for dApp developers to build and market their products effectively.

Moreover, user acquisition in the web3 ecosystem requires addressing issues related to user experience and interface design. Decentralized applications can be complex and unfamiliar to users, requiring clear and intuitive interfaces and user experiences to encourage adoption and engagement.

In addition, user acquisition in the web3 ecosystem raises economic considerations, as dApps and services often require users to hold and manage cryptocurrencies or tokens. This requires addressing issues related to accessibility, usability, and security, as well as the volatility and unpredictability of cryptocurrency markets.

Finally, building a user base in the web3 ecosystem requires addressing social and cultural factors that may influence user behavior and adoption. This includes building trust and confidence in the underlying technology, addressing concerns related to privacy and security, and fostering a culture of innovation and experimentation.

In essence, user acquisition is a significant challenge in the web3 ecosystem, requiring education, marketing, design, economic, and social considerations. Addressing these challenges is crucial to realizing the potential of decentralized applications and services and building a thriving web3 ecosystem with a diverse and engaged user base.

f) Ownership Of Assets

Ownership of assets can be a challenge because some projects do not give users complete ownership over their assets. This is particularly true for centralized projects or platforms that use web3 technology, as they often maintain a certain level of control over the assets that are created and managed on their platform.

One challenge related to ownership of assets is the issue of custody. While blockchain technology can provide a secure and decentralized way to manage digital assets, many projects do not provide users with complete control over the custody of their assets. For example, some projects may require users to store their assets in a centralized wallet or on a centralized exchange, which can introduce risks related to security and counterparty risk.

Another challenge related to ownership of assets is the issue of interoperability. Because assets in the web3 ecosystem are often created and managed on different blockchain networks, it can be difficult to ensure that these assets can be transferred and used across different networks. This can lead to issues related to fragmentation and siloed ecosystems, which can limit the potential for innovation and growth in the web3 ecosystem.

A further challenge related to ownership of assets is the issue of regulation. As mentioned earlier, there is still a great deal of regulatory uncertainty around the ownership and transfer of digital assets, which can create risks and uncertainty for users and companies operating in this space. This can be particularly challenging for decentralized projects, which may face regulatory challenges related to the creation and management of assets on their platform.

While ownership of assets is a core concept in the web3 ecosystem, many projects do not provide users with complete ownership over their assets. This can be challenging for users and can limit the potential for innovation and growth in the web3 ecosystem. To fully realize the potential of this blockchain, it is important for projects to prioritize user ownership and control, as well as interoperability and regulatory compliance.

g) Game Integration Costs: Mitigating the Burden of Taxation for Stores

Game developers often face various challenges when creating and distributing their games, and one of those challenges is the tax imposed by app stores on the integration of games. App stores such as Apple's App Store and Google Play Store charge a percentage of revenue on any in-app purchases, subscriptions, or downloads made through their platform.

For game developers, this means that a significant portion of their revenue generated through these app stores is subject to taxation. This can be a challenge, especially for independent developers who have limited resources and must balance the cost of developing and distributing their games with the revenue generated.

TAX

Another challenge related to the tax on app stores is that it can impact the ability of game developers to monetize their games effectively. For example, if a developer is required to pay a significant portion of their revenue to the app store, they may need to increase the price of their game or in-app purchases to maintain profitability. This can lead to a reduction in the number of downloads and purchases, as users may be unwilling to pay the higher prices.

Furthermore, the tax on app stores can also affect the ability of game developers to compete effectively in the market. If a developer is required to pay a higher percentage of their revenue to the app store, they may be at a disadvantage compared to other developers who are not subject to such high taxes. This can make it more difficult for smaller developers to gain traction and compete against larger, more established companies.

In conclusion, the tax on app stores can be a significant challenge for game developers, impacting their ability to monetize their games effectively and compete in the market. To address this challenge, some game developers are exploring alternative distribution channels or creating their own platforms to distribute their games, while others are seeking ways to optimize their pricing and revenue models to minimize the impact of app store taxes.

FEATURES

Gaming Arcade is a unique platform that offers an array of gaming experiences to its users. The platform provides an extensive collection of different game types to cater to the preferences of every gamer. Users can immerse themselves in hyper-casual games or explore open-world games, or even dive into the world of virtual reality games. The platform's gaming library ensures that every user is entertained, no matter their taste or skill level.

Apart from its diverse game collection, Gaming Arcade offers game integration on its platform. Game developers can integrate their games with the platform, which offers them an opportunity to showcase their creations to a vast audience. The integration process is made simple by the platform's user-friendly interface, which ensures a seamless integration experience.

Gaming Arcade is also committed to promoting fair play among its users. The platform ensures that all users have a level playing field and have a chance to succeed based on their skills and expertise. Additionally, the platform provides complete ownership of assets to its users. This means that users have complete control over their assets and can use them as they see fit.

In conclusion, Gaming Arcade offers a wide variety of game types, game integration, fair play, and asset ownership to its users. The platform aims to provide an unparalleled gaming experience to its users while ensuring transparency, security, and simplicity.

A. Games

Hyper Casual Games

Get ready for a blast from the past with Gaming Arcade's collection of hyper casual games! Our platform is designed to offer a unique blend of nostalgia and modern gaming, providing users with a chance to experience the classic 90's arcade gaming style with a fresh twist. We offer a diverse range of hyper casual games, including the legendary 2048, Pac-Man, and Road Fighter, as well as the iconic Flappy Bird. These games are designed to provide a quick and satisfying gaming experience, making them perfect for users who want to unwind and relax while earning rewards. With easy-to-learn gameplay and exciting rewards, our hyper casual games are the perfect choice for casual gamers looking to monetize their skills and earn while having fun.

Open World Games

Gaming Arcade is all set to introduce Open World Games in its platform, which will provide a unique and immersive experience to the players. Open world games have become increasingly popular in recent years, providing players with the freedom to explore and interact with a vast virtual world. Gaming Arcade's Open World games promise to deliver a similar experience, allowing players to immerse themselves in richly detailed and expansive environments. These games will provide users with the opportunity to explore and discover a variety of unique gameplay mechanics and systems, ranging from intricate crafting and survival mechanics to sophisticated narrative structures. Gaming Arcade aims to create a new benchmark for Open World games, enabling players to experience a world that is both deep and immersive. With its user-friendly interface, Gaming Arcade aims to make these Open World games accessible to all, providing players with a seamless and intuitive gameplay experience. The upcoming Open World games will be the latest addition to Gaming Arcade's already impressive selection of games, including Hyper casual games.

Virtual Reality Games

We're thrilled to unveil our upcoming project - a revolutionary virtual reality gaming experience! Immerse yourself in a world of limitless possibilities and explore all our games in a completely new way. Our VR games will transport you to a hyper-realistic gaming environment with high-quality graphics and cutting-edge game-play. But that's not all! We're building a Metaverse Ecosystem, a virtual world where gamer can socialize and interact with others, and discover all our available games. Our Metaverse is the perfect place for gamer of all skill levels to explore and connect with each other, offering a unique gaming experience.

B. Game On:

Elevate Your Gaming with Our Integrated Platform!

At our platform, we don't just offer a remarkable gaming experience for players; we also empower game developers and professionals to showcase their creativity and reach a wider audience. By integrating their games on our website, developers can leverage our vast network of players and enhance their game's visibility. Our integrated platform provides a seamless and hassle-free experience for developers, simplifying the process of listing their games and reaching new players. With our support and expertise, game developers can focus on what they do best: creating exceptional games that resonate with players worldwide.

C. Power to the Players:

The Ultimate Gaming Experience with Complete Asset Ownership!

At our platform, we strongly believe in empowering users by providing them with complete control and ownership of their assets. We understand that digital assets are valuable and personal, and users should have the freedom to manage and utilize them as they see fit. That's why our platform offers a secure and decentralized infrastructure that enables users to have full control over their digital assets, without the interference of any central authority. We prioritize privacy, security, and transparency to ensure that users can manage their assets with confidence and peace of mind.

D. Unlocking The Best Games:

The Power of Fair Play in Gaming!

At our platform, we're committed to promoting fairness and transparency in gaming. That's why we take auditing seriously and ensure that all games available on our platform have been thoroughly audited. We believe that players deserve a fair chance to win, and by auditing all games before they're listed, we ensure that all players have an equal opportunity to win. Moreover, any game that arrives on our platform for listing and integration will go through a rigorous auditing process to ensure it meets our high standards. With our focus on fair play, you can rest assured that you're playing on a platform that values integrity and honesty.

Platform Infrastructure

The underlying technological architecture encompasses a diverse repertoire of games, featuring an assortment of gameplay modalities and types to cater to the preferences of a wide-ranging audience. The platform infrastructure is further augmented with Non-Fungible Tokens (NFTs), which not only serve as a valuable asset within the digital domain but also offer tangible real-world utilities to users. In addition, the platform includes a lucrative referral system that incentivizes users to share the platform's value proposition with their acquaintances, thereby creating a vibrant and thriving community of users.

Furthermore, the platform provides an array of game integration services, enabling game developers to seamlessly integrate their games with the platform infrastructure. This feature not only offers an opportunity for game developers to increase the visibility of their games but also provides users with a diverse array of games to choose from.

Lastly, the platform will be founded on a decentralized autonomous organization (DAO) governance model, which embodies the principles of transparency, accountability, and community-driven decision-making. This innovative governance model enables users to participate in the decision-making process of the platform and provides a robust mechanism for resolving conflicts and making decisions that align with the community's best interests.

A. Games

Gaming Arcade offers an extensive portfolio of hyper-casual games that span a variety of genres and styles, each designed to take our players on a journey through time and space. From beloved classics like Pac-Man and Tetris, to retro favorites like 2048 and Flappy Bird, to thrilling new titles like Road Fighter and Galaxy Shooter, our platform is a veritable treasure trove of nostalgic and engaging gaming experiences that are sure to captivate and delight players of all ages.

Our carefully curated collection of games is designed to transport players back to the beloved 90s era of arcade gaming, where gaming was a shared experience, and memories were made with every play. We strive to capture the spirit and essence of those beloved games, infusing them with modern elements and incentives that keep players engaged and coming back for more.

At Gaming Arcade, we understand the power of nostalgia and the impact it can have on our players. That's why we are committed to offering a wide range of engaging, nostalgic, and rewarding gaming experiences that capture the magic of the past while embracing the potential of the future. So come join us on a journey through time and space, as we celebrate the timeless appeal of hyper-casual gaming and the memories that we cherish.

1. Games Modules

At Gaming Arcade, we pride ourselves on delivering an unparalleled gaming experience that transcends boundaries and fosters a sense of community among our players. Whether you're a seasoned veteran seeking to hone your skills in competitive 1v1 duels, or a group of friends seeking to engage in a thrilling battle of 1vMany, our platform caters to every preference and skill level. We offer an extensive range of gameplay options, including casual free play sessions, custom room creations for friends and family, and intense tournaments that allow players to showcase their mastery of their chosen games.

Our platform is designed to be versatile, engaging, and immersive, providing a dynamic and vibrant environment where players can let loose, have fun, and forge new friendships with like-minded individuals. In addition to the thrilling gaming experiences, we also provide generous rewards that incentivize players to stay engaged and reach new levels of skill and expertise.

At Gaming Arcade, we are committed to delivering an experience that transcends traditional gaming platforms, providing a space where players can immerse themselves in the games they love, connect with other players, and push themselves to reach new heights of mastery. With our expansive range of gameplay options and engaging community, Gaming Arcade is the ultimate destination for passionate gamers looking to explore and excel in their favorite games.

a. 1vs1 Gameplay Mode

Our cutting-edge platform boasts a breathtaking 1vs1 gaming experience, designed to offer players an adrenaline-filled and rewarding journey. With an array of four unique bet amounts, our platform caters to the gaming preferences of a wide range of players. Our low-stakes Play 01 Matic option offers players a chance to participate in competitive matches with a modest bet of just 01 Matic, giving them a taste of the thrilling 1vs1 gameplay. With the potential to win up to 90% of the bet amount, players can test their skills and take home some exciting rewards.

For players seeking a more exhilarating experience, our Play 05 Matic and Play 10 Matic options provide bet amounts of 05 and 10 Matic, respectively, offering higher stakes for those willing to up the ante. These options give players an opportunity to showcase their prowess and compete with others for more significant rewards

Our platform's pièce de résistance is the Play 50 Matic option, the ultimate gaming experience with a substantial bet amount of 50 Matic. This high-stakes option is perfect for seasoned players seeking to push their limits and take home the biggest rewards. With winnings of up to 90% of the bet amount, players can enjoy a sense of accomplishment and pride in their gaming abilities.

As a platform committed to sustainable growth and innovation, a portion of each match's bet is allocated for continued development. This ensures that our platform remains at the forefront of the gaming industry, providing players with the best possible gaming experience.

Envision an exhilarating scenario where two ardent gamers engage in a riveting high-stakes match, each placing a significant wager of 50 Matic to enter the arena. The triumphant player of this heart-racing competition stands to gain a substantial payout of up to 90% of the bet amount, a testament to their exceptional skills and expertise in the game. As a means of facilitating an uninterrupted and enjoyable gaming experience for all players, a modest platform fee of 10% is levied to support the continuous growth and sustenance of the thriving community on Gaming Arcade.

Here, the amount bet by each player

= 2 x 50 Matic
= 100 Matic for the game

90% of 100 Matic

= 90/100 x 100
= 90 Matic

So, the victorious player walks away with a hefty payout of 90 Matic, a testament to their exceptional gaming skills and the fierce competition within the Gaming Arcade arena.

10% of fees out of the total bet amount,

10% of 100 Matic = 10/100 x 100

= 10 Matic.

Therefore, a small platform fee of 10 Matic is collected to sustain and enhance the Gaming Arcade experience for all players.

b. Custom Room Gameplay Mode

Indulge in an immersive and personalized gaming experience with our revolutionary custom room creation feature. This innovative tool empowers players to curate their own gaming environment, where they can invite their friends to join and set the rules and bet amounts as they desire. Imagine creating a bespoke gaming world, where every detail is curated to suit your preferences, from the board layout to the bet amount. With the personalized code that you send to your friends, they can enter the custom room with ease, and engage in a private and exclusive gaming experience with you.

But, that's not all. If you prefer to join an existing room, our platform allows you to do so with the same ease of entering a code. You can join your friends in an already-created room, where the bet amount is already set by the room creator, and immerse yourself in a fun and competitive gaming session. With endless possibilities for customization, the custom room creation feature is the perfect way to make your gaming experience truly yours.

Moreover, whether you are playing in a custom room or a 1vs1 match, the rewards distribution remains unaltered. We aim to ensure that players are always incentivized to bring their best game, and are rewarded commensurately. So, regardless of the type of gaming experience you choose, rest assured that your rewards will reflect your skill and prowess.

For instance, Player A has the unique opportunity to curate a bespoke gaming experience that caters to their preferences, complete with hand-picked board options and a high-stakes bet of 100 Matic. By sharing a personalized code, Player B can easily join Player A in their custom room for a thrilling 1vs1 showdown where the bet amount increases to a jaw-dropping 200 Matic, taking the competition to new heights. The winner of this exhilarating match will claim a substantial payout of up to 90% of the total bet amount, earning well-deserved recognition for their exceptional gaming skills. Meanwhile, a nominal platform fee of 10% is applied to the bets to ensure a seamless gaming experience for all players and sustain ongoing development of the Gaming Arcade platform.

Therefore,

90% of 200 Matic would be,

$$\begin{aligned} &= 2 \times 50 \text{ Matic} \\ &= 90/100 \times 200 \\ &= 180 \text{ Matic} \end{aligned}$$

As the ultimate champion, the victorious player will be rewarded with an impressive payout of 180 Matic, a fitting recognition of their superior gaming skills and strategic prowess.

90% of 200 Matic would be,

10% of 200 Matic

= $10/100 \times 200$

= 20 Matic

In order to ensure a sustainable and ever-evolving gaming experience for all players, a small platform fee of 10% or 20 Matic is deducted from each game's total bet amount. This helps to support the ongoing development of the Gaming Arcade platform and allows us to continue providing a seamless and engaging gaming environment for players around the world.

c. Tournament Gameplay Mode

At the heart of our platform lies a commitment to fostering an environment of friendly competition and continuous engagement among our players, and our tournaments are a prime manifestation of this ethos. These events are thoughtfully organized on a monthly or weekly basis, depending on the demand and participation levels, and serve as a platform for players to test their mettle and display their proficiency while enjoying the thrill of the competition. Our diverse selection of games caters to all tastes and interests, ensuring that every participant has a chance to engage in an exhilarating and stimulating gaming experience.

After the sale of the Alpha Pass NFTs, daily paid tournaments will be organized of **Prize Pool worth \$10,000** which will be fueled by the NFT Sales Revenue.

This infusion of resources enhances the stakes and excitement of our tournaments, giving you an even more compelling reason to jump into the arena and emerge as a champion.

Moreover, tournaments offer more than just a venue for players to hone their skills and enhance their competitiveness. Participants have the opportunity to win impressive prizes and gain recognition for their performance, making the tournament experience both gratifying and fulfilling. At the heart of our mission is the desire to create a vibrant, tight-knit community of players who relish the fun, challenge, and thrill of gaming. We invite you to join us and be a part of this dynamic, rewarding, and ever-evolving community of gamers.

i. Free Entry Tournament

At Gaming Arcade, we recognize the pivotal role of player engagement in shaping their gaming experience. As such, we are proud to offer a selection of free tournaments that foster a competitive and exhilarating atmosphere for all to enjoy.

Our free tournaments serve as a unique opportunity for both seasoned gamers and novice players to put their skills to the test and revel in the excitement of the competition. With a diverse range of games to choose from, players can vie for the top score, culminating in a momentous victory that showcases their prowess.

While tournament entry is free of cost, players are required to pay transaction or gas fees upon submission of their scores. This measure serves to ensure that the tournament runs smoothly and that every player enjoys an optimized gaming experience.

In our relentless pursuit of providing users with a gratifying and enriching experience, we have thoughtfully curated a fair and extensive prize distribution system for our tournaments. The prize pool is thoughtfully determined by the platform, taking into account several factors, such as the number of participants and the level of competition. The prize money is distributed in accordance with the tournament's regulations, guaranteeing that winners are deserving and that the competition remains impartial and equitable for all.

ii. Paid Entry Tournament

At the heart of our platform's essence lies the competitive spirit of our players, embodied through our paid entry tournaments. These events bring together the most exceptional talents in our community to battle for a slice of the prize pool, vying for a chance to showcase their gaming mastery and earn a substantial reward. Participation in these tournaments entails an entry fee, which is judiciously established by the platform to ensure a fair and balanced competition. The platform also determines the number of winners, further fostering an environment of equitability and impartiality.

Our prize pool distribution system is based on a simplistic yet elegant formula. The prize pool is calculated by multiplying the entry fee by the total number of games played, ensuring that the reward is commensurate with the effort put forth by players.

Prize Pool

**= Entry Fee x Total Number
of Games Played**

For instance, in a hypothetical tournament with an entry fee of 5 Matic per player and 1600 games played, the prize pool would amount to 8000 Matic.

Prize Pool = 5 x 1600

**//Prize Pool = Entry Fee x Total Number
of Games Played**

= 8000 Matic

This sum would be distributed among the top-performing players in line with the rules and regulations established by the platform.

i) Unleash the Tournament Thrills

Compete for Daily Rewards Exceeding \$10,000!

As we roll out our Alpha Pass NFTs, a monumental revenue of \$20 million is poised to surge from their sale. Within this, 10% (equivalent to \$2 million) will take its place in the Dev Wallet, serving the vital purpose of ensuring our platform operates seamlessly and impeccably, amplifying your gaming adventure. The lion's share, an impressive 90% (equivalent to \$18 million), will find its way into the Tournament Wallet, igniting a bonanza of Daily Paid Tournaments crowned with a substantial \$10,000 prize pool. 50% of creator fees and 20% of the Tournament Treasury are annually added for continuous growth. This allocation will etch a rich reservoir for tournaments spanning five years and beyond, courtesy of the Tournament Wallet. As a treasured Alpha Pass holder, you're gifted with 10 entries to these exhilarating contests. Brace yourself, for the tournament's treasure chest is a synergy of the Tournament Wallet's \$10,000 and 90% of paid entries. This harmonious blend paves the path for rewards beyond \$10,000, painting your gaming journey with possibilities of remarkable daily earnings. Welcome to an unprecedented realm where extraordinary rewards await each day's pursuit.

Now,

$$\begin{aligned} \text{The Prize Pool} &= \text{[90\% of paid entries x} \\ \text{of the} & \text{No. of Games played]} \\ \text{Tournament} &+ \\ & \text{\$10,000 (can be more or less} \\ & \text{depending on the NFT sales)} \end{aligned}$$

For instance, let's consider an example where the entry fee is set at \$10, and the number of games played with paid entries is 1600. Now, applying this data to our formula,

$$\begin{aligned} \text{Prize Pool} &= [9 \times 1600] + \$10,000 \\ &= \$14,400 + \$10,000 \\ &= \$24,400 \end{aligned}$$

The total Prize Pool in this scenario would be \$24,400, which would be distributed among the top-performing players according to the rules and regulations set forth by the platform.

Annual Rebalancing and Engaging Prize Pools

Experience year-round tournaments powered by 50% of creator fees and the Tournament Treasury's annual additions. Our strategic approach extends planned tournaments for over five years, offering ample opportunities to thrive and earn.

Dynamic Tournament Rewards: Reflecting Community Support

Tournament Prize Pools, influenced by factors like NFT sales revenue and paid entries, vary from slightly below \$10,000 to beyond. 10% of entry fees align with our platform distribution model, and 90% fuels Current Tournament Pools.

At Gaming Arcade, the Alpha Pass NFTs aren't just tickets to thrilling tournaments but investments in a future brimming with gaming excitement and rewards.

Fostering Thrilling Competitions: Sustaining Tournaments with the Tournament

In our commitment to exhilarating tournaments, the Tournament Treasury stands as a beacon of sustainability. It's fueled by a strategic allocation of resources, ensuring that the thrill never fades.

Diverse Revenue Streams for Everlasting Tournaments

A portion of the revenue from diverse sources pours into the Tournament Treasury. Notably, 2% from 10% of commissions from Gameplays and Paid Tournaments entries, and 2% of Listed Game Revenue, fortify this vital fund. The dedication of 50% of creator fees, 50% of Game Boy sale profits and 30% of Sponsored Tournaments further bolsters it.

Empowering Your Gaming Experience

This dynamic fund empowers us to offer exciting tournaments for years to come. It showcases our dedication to fostering a gaming community that relishes fierce competition and boundless excitement. The Tournament Treasury reflects our promise to you – a platform that remains vibrant and engaging, always.

d. Free Play Mode

Our platform recognizes that every new player has a unique approach to learning and developing their gaming skills. That is why we offer a comprehensive and free Play Free mode for all of our games. This mode provides players with a zero-risk and worry-free environment to familiarize themselves with the games, learn the rules, and practice their strategies without the pressure of placing bets or risking real money.

Our Play Free mode is designed to encourage players to experiment with different game modes, options, and settings, enabling them to explore the game's mechanics and develop their unique gaming style. We understand that every player has their own pace of learning and may require more time to master the games, so we offer unlimited access to the Play Free mode.

Moreover, our platform takes pride in offering a vast selection of games, in our Play Free mode. With this variety, players can experience a range of games and challenges to keep their gaming journey engaging and exciting.

In conclusion, our Play Free mode is the perfect solution for players who want to enhance their gaming skills and gain confidence before diving into the world of betting. It is an accessible, no-pressure environment that enables players to learn, grow and prepare themselves for the thrill of betting, and ultimately, success on our platform.

e. Open Challenges

Introducing the Open Challenges, a revolutionary game type that has been added to our platform. This cutting-edge gameplay module provides our users with a unique and thrilling experience, allowing them to place bets of their own choice and showcase their gaming prowess in a competitive and transparent environment.

Upon completion of a game, users' scores and corresponding bet amounts are displayed as cards to other players, promoting transparency and encouraging healthy competition. As the winner of each challenge takes home a substantial 90% of the bet amount, the competition is even more fierce.

Our commitment to creating an immersive and engaging experience is further reflected in the Open World Challenges module. We've taken care to ensure a level playing field for all users, and our dedication to transparency and fairness is evident in the way the challenges operate.

2) Game Types

At Gaming Arcade, we pride ourselves on offering a wide variety of games to cater to the diverse interests of our players. Among our current offerings are Hyper Casual Games, which can come in different game modes such as: 1vs1 score-based games and 1vs1 real-time match games. These games provide players with a quick and exciting gaming experience, allowing them to challenge themselves and others to reach the top of the leaderboard.

Furthermore, we are thrilled to announce the highly anticipated launch of Open World games on the Gaming Arcade platform. Our dedicated team of developers and designers have been working tirelessly to bring this exciting addition to our collection of games, and we believe it will be a game-changer for our users. The immersive gameplay experience of Open World games is unparalleled, allowing players to explore vast virtual worlds and embark on thrilling adventures. We are confident that our users will love the challenging gameplay, stunning graphics, and engaging storylines that Open World games offer. With this launch, we aim to raise the bar in the gaming industry and establish Gaming Arcade as a leading platform for cutting-edge gaming experiences.

To further expand our gaming portfolio and bring even more immersive experiences to our players, we are excited to announce that we will soon be launching VR Games. With this new addition, our players can expect a highly immersive and interactive gaming experience that will transport them to new and exciting virtual worlds, offering a level of immersion and engagement like never before. We are dedicated to continuously improving and evolving our gaming platform, and are excited to bring new and innovative experiences to our players.

a. Hyper Casual Games

In an effort to create an inclusive and captivating gaming atmosphere for our patrons, we at Gaming Arcade take great pride in offering a diverse array of hyper casual games that cater to those seeking an immediate, gratifying gaming experience. With their lightning-fast, user-friendly nature, our curated collection of hyper casual games - featuring iconic titles such as Pac-Man, 2048, Road Fighter, and Flappy Bird - delivers a perfectly balanced blend of nostalgia and novelty, providing hours of entertainment and excitement for both novice and veteran gamers alike.

At Gaming Arcade, we offer two types of hyper casual games for our users to enjoy: 1vs1 score-based games and 1vs1 real-time match games. The score-based games allow users to play at their own pace and compete with other players based on their highest score, making them ideal for those looking to hone their skills or simply unwind. In contrast, the real-time match games provide a more dynamic and interactive experience, allowing users to challenge other players in live matches and showcasing their gaming prowess. Both options present an opportunity for players to earn rewards and demonstrate their gaming prowess, promising a fun and engaging experience for all.

b. Open World Games

Open-world games are a highly popular and dynamic genre that has captured the hearts and minds of gamers worldwide. As such, Gaming Arcade is excited to announce the forthcoming launch of their own open-world games, which promise to take the gaming experience to new heights. By providing a vast and immersive environment that players can explore at their own pace, open-world games offer a unique and captivating experience. These games typically offer a multitude of side quests, hidden treasures, and mysteries to uncover, allowing players to engage with the game world on a deep level.

At Gaming Arcade, the upcoming open-world games are being crafted with meticulous attention to detail, so as to provide an unparalleled and unforgettable gaming experience. The open-world games are designed to keep the player engaged for hours on end, by providing them with an extensive and vibrant game world to explore. By using state-of-the-art graphics and immersive sound design, Gaming Arcade's open-world games aim to provide a fully-realized experience that transports players to another world.

With the launch of these new games, Gaming Arcade is taking their user experience to a whole new level.

Players can expect a multitude of new features, including unique and exciting side quests, in-game collectibles, and an enhanced gaming experience with the inclusion of NFTs. So get ready to embark on an epic adventure and immerse yourself in the ultimate open-world gaming experience, coming soon to Gaming Arcade.

c. VR Games

At Gaming Arcade, we are thrilled to announce the upcoming launch of our latest innovation – a new array of Virtual Reality (VR) games. With the goal of offering the most immersive and cutting-edge gaming experience to our users, we have been hard at work developing a range of VR games that will bring a whole new dimension to online gaming.

Our VR games have been meticulously designed to provide users with a fully immersive experience that will transport them into a whole new world of gaming. With stunning visuals, realistic sounds, and interactive gameplay, our VR games will offer a level of engagement and excitement that is unparalleled in the world of online gaming.

We are committed to offering a diverse range of VR games that will cater to all gaming preferences. Whether you're a fan of action-packed first-person shooters, thrilling racing games, or immersive role-playing adventures, our upcoming array of VR games will have something for everyone.

Our VR games have been meticulously designed to provide users with a fully immersive experience that will transport them into a whole new world of gaming. With stunning visuals, realistic sounds, and interactive gameplay, our VR games will offer a level of engagement and excitement that is unparalleled in the world of online gaming.

B. NFTs

1. Introduction

Step into the world of Gaming Arcade's exclusive NFTs, where gaming meets artistry and innovation. Our NFT collection opens the door to an entirely new level of gaming excitement. Within this collection, you'll find two unique and prestigious NFT types: the Alpha Pass and the Elite Pass. The Alpha Pass, totaling 100,000 in number, is your key to enhanced gameplay and the path to claiming the illustrious Elite Pass. On the other hand, the incredibly exclusive Elite Pass, limited to just 100, can only be claimed through an extraordinary achievement: completing 100,000 gameplay sessions on your Alpha Pass. Your Alpha Pass isn't just a ticket to the gaming world; it's a recording of your journey, offering access to \$10,000 worth of daily paid tournaments and paving the way to seize the Elite Pass. With the Elite Pass, you're not only unlocking the pinnacle of gaming status but also joining the elite ranks of our Decentralized Autonomous Organization (DAO), and gaining the power to claim your share of 50% of the platform's revenue. Experience gaming like never before with Gaming Arcade's unparalleled NFT collection.

2. NFT Integration in Gaming Arcade:

Elevating Gaming Experience through Digital Ownership

Gaming Arcade has taken a revolutionary leap by seamlessly integrating NFTs into our platform, revolutionizing the gaming landscape. At the heart of this integration are two exceptional NFTs: the Alpha Pass and the Elite Pass. These NFTs redefine how players engage with games by adding unprecedented value, ownership, and opportunities.

i) Alpha Pass NFT: Unlocking Enhanced Gameplay and Rewards

The Alpha Pass NFT is more than just a token; it's your gateway to an enriched gaming journey. This NFT not only records and preserves your gameplay data, immortalizing your accomplishments, but it also offers a range of benefits that enhance your gaming prowess. As an Alpha Pass holder, you're bestowed with 10 complimentary entries to daily paid tournaments with an incredible prize pool of \$10,000. It's not merely a ticket to these tournaments; it's an exclusive opportunity to showcase your skills and compete for impressive rewards.

ii) Elite Pass NFT: The Ultimate Gaming Achievement

The Elite Pass NFT is the pinnacle of gaming achievement within the Gaming Arcade universe. While the Alpha Pass sets you on the path, the Elite Pass is an honor bestowed upon the truly dedicated. To earn this exclusive NFT, one must complete an exceptional 100,000 gameplay sessions on their Alpha Pass.

But the rewards are monumental – not only does it grant you revered status, but it opens the doors to remarkable benefits. As an Elite Pass holder, you become a core member of our Decentralized Autonomous Organization (DAO), sharing 50% of the platform's revenue and influencing the future of the Gaming Arcade community.

iii) Advancing Gaming Experience with NFTs

The integration of NFTs into Gaming Arcade adds an entirely new layer of immersion and engagement. By combining ownership, rewards, and exclusive access, we're creating a gaming environment that transcends traditional boundaries. Your NFTs aren't just collectibles; they're your keys to unlocking an extraordinary journey within the gaming world. With the Alpha Pass and the Elite Pass NFTs, we're reshaping the very essence of gaming, turning it into an experience that's personalized, rewarding, and truly yours. Join us as we embark on this groundbreaking venture, where digital ownership meets unparalleled gameplay.

3. NFT Creation and Attributes: Crafting Unique Gaming Assets

NFTs, or Non-Fungible Tokens, are the foundation of Gaming Arcade, creating distinctive digital assets that redefine gaming. Explore how NFTs like Alpha Pass and Elite Pass are crafted and their special attributes.

i) Creation Process: Crafting Distinct Digital Pieces

NFTs are meticulously crafted, infusing digital assets with uniqueness. Alpha Pass and Elite Pass NFTs are carefully created, representing a piece of the gaming world. Alpha Pass NFTs with a gameplay count of 100,000 showcase dedication. Elite Pass NFTs are exclusively for those achieving this remarkable feat.

ii) Attributes Defining Identity: Beyond Aesthetics

Attributes define NFTs, going beyond looks. Alpha Pass NFTs store data, recording your gaming journey and accomplishments. Elite Pass NFTs' exclusivity sets them as the ultimate honor badge.

iii) Scarcity and Ownership: Unlocking Exclusive Benefits

Alpha Pass and Elite Pass NFTs showcase scarcity, ensuring uniqueness. Alpha Pass NFTs grant access to daily paid tournaments worth \$10,000, enhancing gaming. Elite Pass NFTs' rarity offers platform revenue stakes and influence in the Gaming Arcade DAO.

iv) A Gaming Revolution

NFTs redefine gaming ownership and value. Our Alpha Pass and Elite Pass NFTs use this innovation to enrich gameplay. Your Gaming Arcade journey is digitally etched, each NFT carrying your story, attributes, and a unique experience that shapes your virtual world engagement.

4. Ownership and Trading of NFTs: A Realm of Possibilities

In the Gaming Arcade ecosystem, owning NFTs opens a world of opportunities. Players can easily buy, sell, or trade NFTs like Alpha Pass and Elite Pass, making transactions a breeze through our seamless integration with OpenSea. With a smooth and hassle-free checkout process, players will be redirected to OpenSea's website, ensuring a seamless experience.

i) The Power of Ownership

Owning NFTs, like Alpha Pass and Elite Pass, comes with exclusive benefits. It's not just a digital collectible; it's a key to enhanced gameplay, rewards, and engagement within Gaming Arcade.

ii) Navigating the NFT Marketplace

Participating in the NFT marketplace is straightforward. Players can effortlessly buy, sell, or trade NFTs like Alpha Pass and Elite Pass. This dynamic marketplace fosters strategic trades, adding an extra layer of excitement to the gaming journey."

5. NFT Rewards and Benefits

Unlocking the Future of Gaming

At Gaming Arcade, your gaming achievements are not just celebrated, they're rewarded. Earning the coveted Elite Pass NFTs is a testament to your gaming prowess. These NFTs aren't just collectibles; they're tickets to a world of exclusive content, special events, and in-game advantages that elevate your gaming experience.

i) Alpha Pass NFT: A Gateway to Riches

Owning the Alpha Pass NFT is like possessing a treasure map. With a modest investment, players unlock access to daily paid tournaments worth \$10,000 or more. Here's the magic – you can potentially earn more than your initial investment in a single day. And the excitement doesn't stop there – this golden opportunity persists for up to 5 years or more. The Alpha Pass NFTs' revenue fuels these lucrative tournaments, and an Annual Rebalancing ensures their continuity, promising continuous earnings.

ii) Elite Pass NFT: More than Ownership

Owning an Elite Pass NFT isn't just about possession; it's about power. Not only do you own the Elite Pass itself, but you also virtually own a part of the Gaming Arcade Platform. Sharing 50% of platform revenue through staking, you become a crucial member of the Gaming Arcade DAO. Early adopters reap even more rewards by sharing accumulated staking rewards from the platform's launch day. The Elite Pass isn't just an NFT; it's a doorway to potential, influence, and a stake in the gaming future.

6. Staking NFTs and Passive Income

Empowering Your Elite Pass

In the world of Gaming Arcade, owning an Elite Pass NFT opens doors to more than just exclusive perks – it leads to a realm of passive income through staking. The concept is simple yet powerful: by holding and staking your Elite Pass NFTs, you not only solidify your ownership but also earn passive rewards.

i) Earning While Holding: The Staking Magic

Staking your Elite Pass NFT means you're pledging it to the Gaming Arcade ecosystem. This pledge allows you to share in the platform's revenue, which is no small feat. As transactions flow and the platform prospers, so do your rewards. The longer you hold, the more you earn, turning your Elite Pass NFT into a source of consistent, hassle-free income.

To illustrate this, let's consider an example. If 20,000,000 Matic's games were played on our platform, generating 20,00,000 Matic in commission, the platform revenue to be shared with NFT stakers would be 92,000 Matic.

Platform revenue to be shared

$$= \frac{(20,00,000 - 11.5\%) - 20\%}{2}$$

//Platform revenue to be shared

$$= \frac{(10\% \text{ Commission} - \text{Referral}) - 20\% \text{ of Tournament Treasury}}{2}$$

$$= \frac{(20,00,000 - 11.5/100 \times 20,00,000) - 20\%}{2}$$

$$= \frac{(2,30,000 - 20/100 \times 2,30,000)}{2}$$

$$= \frac{2,30,000 - 46,000}{2} = \frac{1,84,000}{2}$$

$$= 92,000 \text{ Matic}$$

So, half of this revenue, or 92,000 Matic, would be distributed among the Elite Pass NFT Stakers. This is just one example of the many benefits that come with staking your NFT. By joining our platform and staking your Elite Pass NFT, you will be able to enjoy these benefits and much more.

ii) Incentives and Rewards: Amplifying Your Gains

But it doesn't end there. We believe in acknowledging your commitment. By staking your Elite Pass NFT, you're not just receiving a percentage of the platform's revenue; you're also securing exclusive rewards and incentives. These incentives are designed to sweeten the deal, making your staking journey all the more rewarding.

iii) A Bright Future with Passive Income

Staking your Elite Pass NFT goes beyond numbers – it's about shaping your future in the Gaming Arcade ecosystem. By actively participating in staking, you're contributing to the platform's growth while reaping the rewards yourself. It's a win-win scenario that aligns your interests with the gaming community's prosperity. Your Elite Pass NFT isn't just a key to the gaming realm; it's your pathway to continuous, passive income and a stake in Gaming Arcade's evolving success.

iv) The Revolutionary Yield Multiplier:

A Fair Distribution of Rewards for Committed Elite Pass NFT Holders

In order to promote a more equitable distribution of rewards amongst those who have made a significant commitment to staking their Elite Pass NFTs, we have introduced a revolutionary feature, the Yield Multiplier. This advanced functionality operates on the autonomous distribution of staking rewards and factors in the duration of time that an NFT holder has staked their assets on our platform. Notably, the yield multiplier can only be activated when NFTs are staked for a locked period of time. This ensures that those who have demonstrated a prolonged allegiance to our ecosystem are justly rewarded for their unwavering trust and participation. With the introduction of the Yield Multiplier, Elite Pass NFT holders can be confident that their investments will be appreciated and rewarded in a transparent manner that is indicative of their steadfast commitment to our platform.

v) Yield Booster:

Promoting Competitive and Gratifying Gaming Ecosystem at Gaming Arcade

Gaming Arcade's unwavering commitment to promoting a competitive and gratifying gaming ecosystem is exemplified in our pioneering feature, the Yield Booster. This innovative functionality takes cognizance of the proficiency and devotion of our players, and rewards them based on their degree of involvement with our platform. Diverging from traditional gaming setups, where only victories and defeats matter, the Yield Booster is crafted to incentivize players on the basis of their gameplay frequency on our platform.

The higher the number of games a player participates in, the greater their booster score, and by extension, the more substantial the reward payout. Moreover, the yield booster can be activated for both flexible and fixed staking of Elite Pass NFTs, enabling players to earn rewards irrespective of their staking preferences. By placing emphasis on player engagement over outcome, Gaming Arcade pledges to provide every user with an impartial and equitable opportunity to reap the benefits of their dedication and time spent on our platform.

The benefits of staking NFTs are abundant and varied, and our platform's commitment to providing a fair, autonomous, and rewarding experience for our users is reflected in our innovative NFT staking feature.

Referrals

Our referral system is an innovative and dynamic user acquisition strategy that offers increasing referral rewards to our loyal players. With a multi-stage structure, users can earn a greater percentage of rewards as they successfully invite more players to the platform. By incentivizing users to invite friends and family to join our community, our platform offers an unlimited earning potential through the five-stage referral system.

Our referral program offers a first-stage reward of 5%, which is highly competitive and decreases as the user progresses through the stages i.e., 3% reward at the second-stage, 2% at the third-stage, 1% at the fourth-stage and lastly 0.5% at the fifth-stage. This creates a sense of urgency for users to take advantage of this offer and generate passive income. By contributing to the growth and development of our platform, our players can feel a sense of pride in their contribution to our community's success.

Our platform rewards users for their successful referrals through a complex system that considers the bet amount of the games played by each referral. When a referral plays a game with a bet amount, the user who referred them will receive a percentage of the commission earned from that game, based on the stage of the referral.

Revolutionize Your Games with Seamless Integration

In an era of fast-paced technological advancements, we recognize the crucial role game developers play in driving the growth and expansion of the gaming industry. Our vision is to create a platform that fosters an environment of creativity and innovation, where developers can integrate cutting-edge web3 technology to unlock new possibilities for their games.

Our goal is to provide developers with an easy-to-use and comprehensive solution that enables them to seamlessly integrate the latest web3 features into their games. With our platform, developers can take advantage of our robust and secure infrastructure, allowing them to focus on crafting captivating gameplay experiences that will keep players engaged for hours on end.

By embracing web3 technology, developers can tap into new revenue streams, expand their user base, and stay ahead of the competition. Our platform is designed to empower game developers to achieve all of these goals, while also providing players with a truly immersive and engaging gaming experience.

ii. Analytical Dashboard

Our platform takes game development and management to the next level by offering a powerful analytical dashboard that provides developers with a tool to monitor their dApp's performance. With a comprehensive overview of critical events occurring within their game, developers can easily track their progress and gain valuable insights to make informed decisions, optimize their games, and enhance the overall gaming experience.

Our analytical dashboard delivers in-depth quality stats that allow developers to fine-tune their game, optimize its performance, and provide players with a unique and engaging experience. By leveraging the dashboard, developers can take their game to the next level, providing users with an immersive and delightful experience that keeps them coming back for more.

iii. Token Manager

We strive to empower game publishers by providing them with the tools they need to maximize the potential of their games and deliver a seamless gaming experience for players. Our state-of-the-art Token Manager offers an easy and efficient way for publishers to manage the tokens (Matic) they receive as game commission. This powerful tool ensures seamless distribution of tokens to Developer Commission (44.25%), Referral rewards (11.5%), and Staking rewards (44.25%). Furthermore, out of the Developer Commission, 10% will be shared with the Gaming Arcade's platform, while the remaining 90% will be available for withdrawal by the game publishers. With the Token Manager, game publishers can focus on the performance of their games, make informed decisions, and implement strategies that align with their long-term goals. At our platform, we are committed to providing game publishers with the necessary tools to create engaging experiences for their players.

iv. Built-in Compliance

At our platform, we take compliance seriously, and we understand the importance of maintaining a level playing field for all game developers and publishers. To that end, we have implemented a multi-level compliance feature that ensures fairness and standardization across all game categories.

Our first level compliance provides a set of basic guidelines to which all games must adhere. This helps to maintain a secure and stable gaming environment and ensures that all users have a consistent experience. In addition, our second level compliance takes into account the specific needs and requirements of each game category, further enhancing our commitment to fairness and standardization.

Our compliance feature is a crucial aspect of our platform, as it allows us to provide a secure and trustworthy gaming environment for all users. By upholding the highest standards of compliance, we support the continued growth and innovation of the web3 gaming ecosystem, and we are committed to providing a level playing field for all game developers and publishers.

v. Promote with us

At our platform, we recognize that game developers need more than just a great game to succeed in the highly competitive world of web3 gaming. That's why we offer a suite of sophisticated and effective marketing and promotional services to help developers achieve their goals and unlock their game's maximum potential. From targeted advertising and email campaigns to influencer marketing and social media management, our team of experts has the tools and expertise to help you grow your game and reach your desired audience. Our goal is to provide developers with the support they need to thrive in the ever-changing landscape of web3 gaming, and to help them take their game to the next level.

At Gaming Arcade, we understand that integrating a game or gamification platform into your mobile app or website can be a daunting and time-consuming task. That's why we offer an unparalleled level of expert guidance and support to ensure a seamless and smooth integration experience.

Our highly skilled and dedicated development team will take the lead in the integration process, working closely with you every step of the way to bring your vision to life. With our help, you can say goodbye to the hassle and stress of integration, and focus on what you do best - creating captivating games that engage and delight your users.

To learn more about our integration services, contact us at hello@gamingarcade.io. Our team is ready to answer any questions you may have and help you get started on the path to success.

Third-Party Wallets

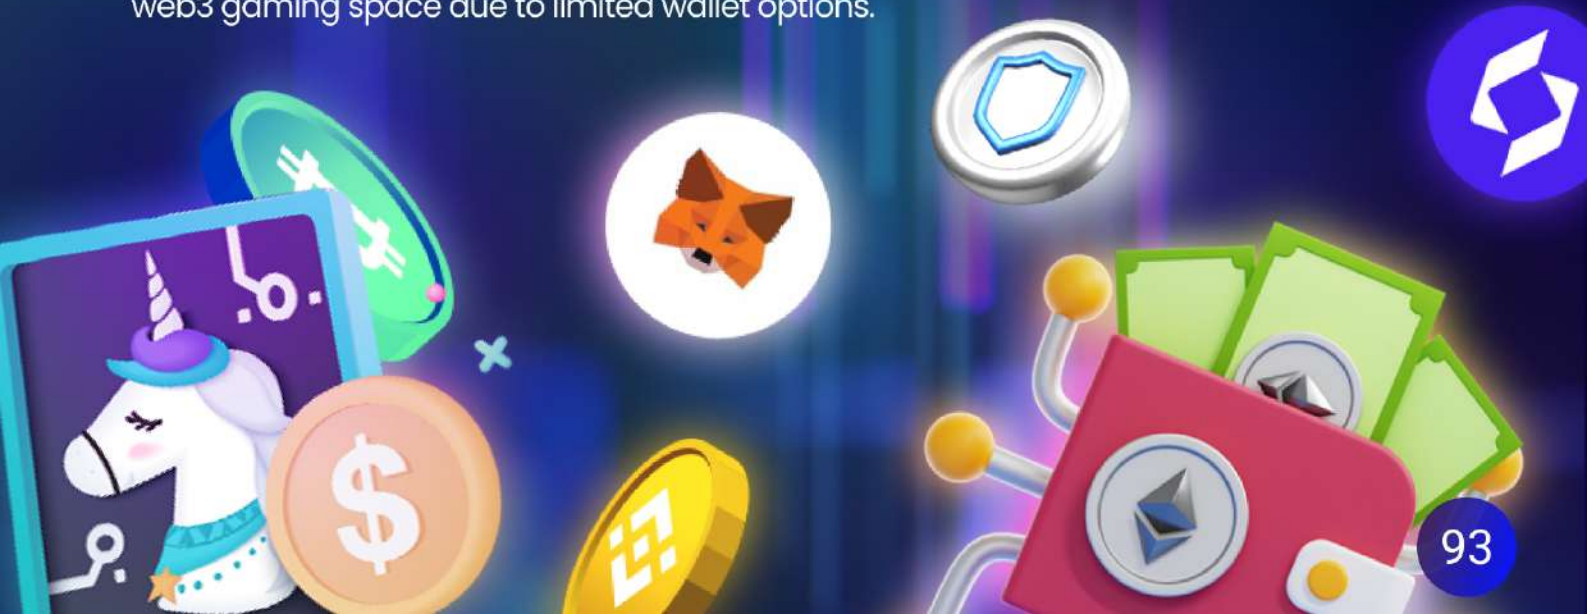

Creating a sustainable and growth-focused gaming ecosystem is at the forefront of Gaming Arcade's priorities. To achieve this, we recognize that it is crucial to establish a reliable and user-friendly solution for accessing our ecosystem. We are committed to providing a seamless and convenient user experience for players in the web3 world, ensuring that they have the means to easily access and engage with our ecosystem. Our focus on building a dependable and accessible platform is the foundation for the immersive and engaging gaming experience that we offer.

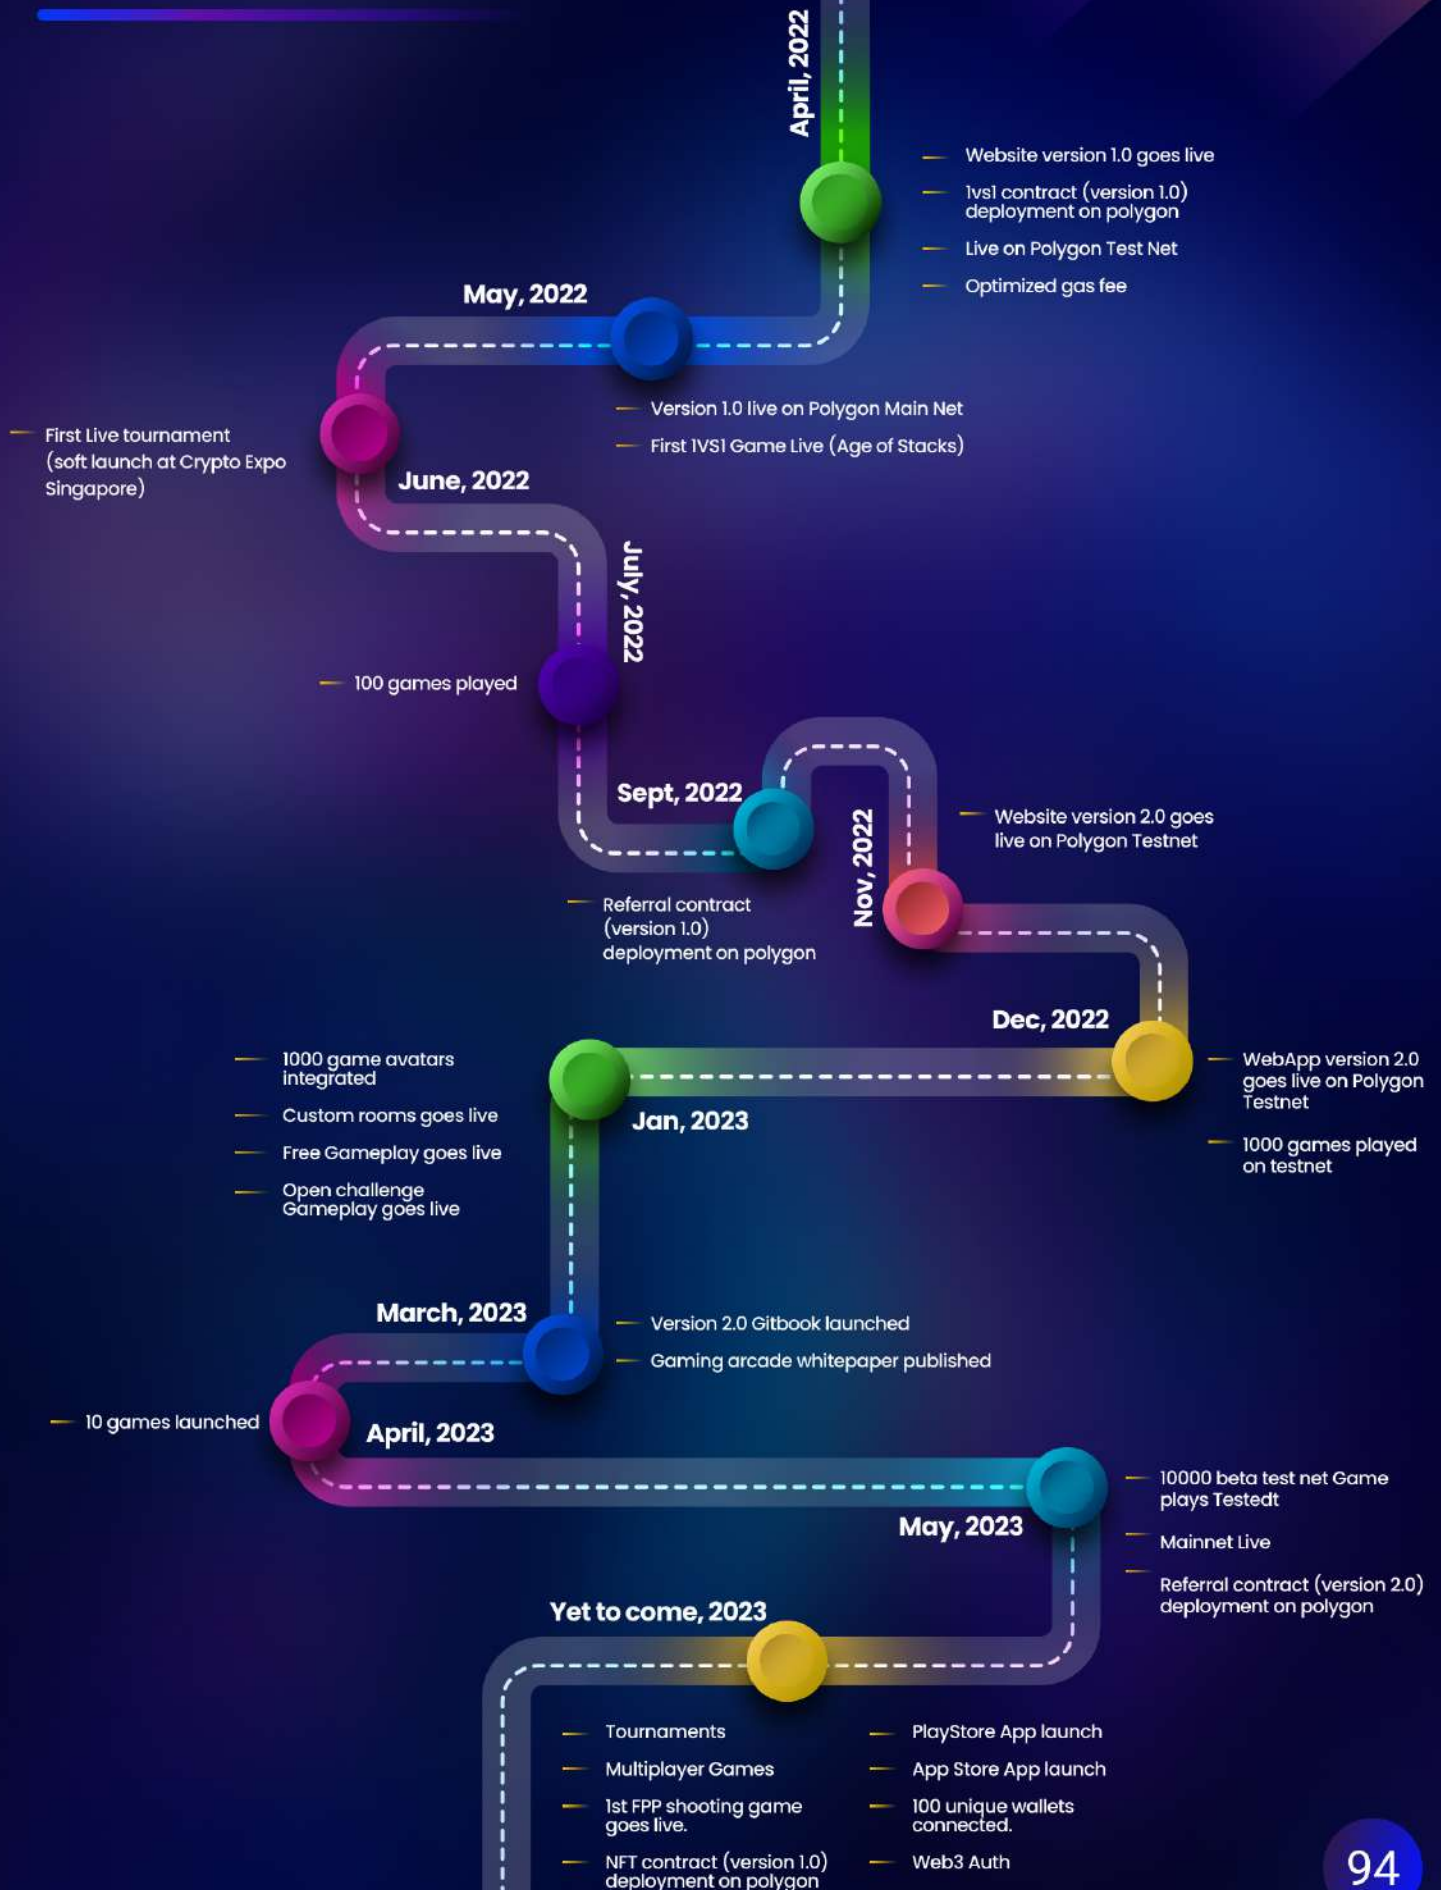

Gaming Arcade's ecosystem is committed to empowering game developers and players alike by offering a diverse and extensive range of wallets to choose from. We take pride in supporting prominent names such as Metamask, Wallet Connect, Safe Pal, Zerion, Fireblocks, Crypto.com Defi wallet, and many more. By providing such a vast array of wallet choices, we offer our users the freedom and flexibility to select the option that best aligns with their unique requirements and preferences. This dedication to diversity and inclusivity is just one of the many ways in which Gaming Arcade provides a superior web3 gaming experience.

Supporting a wide range of wallets is a crucial aspect of creating a seamless and user-friendly gaming experience in the web3 world. By offering a diverse collection of supported wallets, Gaming Arcade provides users with the freedom and flexibility to choose the option that best aligns with their requirements and preferences. This allows users to seamlessly integrate their existing wallets, without the need for any additional setup or installation. Additionally, supporting multiple wallets ensures that users are not limited to a single option, reducing the chances of any potential roadblocks or barriers. Ultimately, the goal is to create an inclusive and accessible environment that caters to the diverse needs and preferences of all users, promoting growth and innovation within the web3 gaming ecosystem.

Furthermore, by accommodating a diverse range of wallets, Gaming Arcade can attract a wider range of users, including those who may have previously been excluded from the web3 gaming space due to limited wallet options.

Roadmap

TERMS & CONDITIONS

About Gaming Arcade

Gaming Arcade, a visionary gaming initiative, is spearheaded by Zelta Labs LLC, a company registered in Saint Vincent and the Grenadines. As a proud owner, operator, and manager of the Gaming Arcade website, Zelta Labs LLC is committed to creating a dynamic gaming platform that offers unparalleled gaming experiences to its users.

Please read these terms carefully before you start using Gaming Arcade. By using Gaming Arcade, you agree to accept these terms and abide by our privacy policy. If you are unwilling to accept these privacy policies, you must not access or use Gaming Arcade.

Access to Gaming Arcade is restricted to individuals who are 18 years of age or older. By accessing and using Gaming Arcade, you confirm and guarantee that you have attained the legal age required for a binding agreement with Gaming Arcade. Failure to meet these criteria disqualifies you from accessing or using Gaming Arcade.

When utilizing the Services, which includes the Gaming Arcade website, affiliated websites, application programming interfaces, and any of our desktop or mobile applications, you hereby acknowledge and agree that:

You must confirm that you have read and understood these Terms and Conditions of Service, our Privacy Policy, and any obligations and rules associated with each competition (as defined in these Terms) that you participate in, in their entirety;

You consent to be legally obligated by the Terms;

You confirm that you possess the authority and capability to agree to these Terms. Refusal to be bound by these Terms will result in the inability to use the Services. Therefore, if you do not wish to be bound by the Terms, you cannot use the Services.

1. General Use

1.1 Change to the Terms

We reserve the right to amend, alter, adjust, or revise the Terms at any time, and we may provide notice on the Site or through the use of the Services. Your continued usage of the Services implies your acceptance of any newly added or modified Terms. It is your responsibility to review the Terms periodically for any changes, thus kindly revisit this page regularly.

1.2 Eligibility

When agreeing to these terms, you affirm and acknowledge that:

- a. You confirm that you are an individual who has reached either the age of majority in your jurisdiction or 18 years of age and possess the ability to establish a legally binding agreement with Gaming Arcade.
- b. It is confirmed that you are currently situated in a jurisdiction where there are no legal restrictions or limitations on participating in any Service you access.
- c. You agree to strictly adhere to these Terms at all times.

2. Services

2.1 Our Services

Gaming Arcade enables users to engage in various skill-based games, online tournaments, and competitions (collectively referred to as "Competitions") with other Gaming Arcade users through a portal. Users with a wallet can participate in Competitions through our Services periodically. We retain the right, with or without notification to you, to:

- a. Alter suspend, or terminate your access to the Site and Services without incurring any liability, for any reason, with or without prior notice.
- b. We may interrupt the operation of the Site or Services as required to carry out maintenance, error correction, or other work. In addition, we may suspend the wallet of any user and blacklist their IP address who breaches or who we have reasonable cause to believe will breach these Terms at any time without liability and without notice.

2.2 Remote access and updates

We reserve the option of providing technical assistance for Services at our discretion from time to time. This technical support may require remote access to the Devices on which the Services are run. Moreover, we may remotely access your Device without prior notification to deploy patches, updates, and modifications to Gaming Arcade or update the Services. By accepting these terms, you agree to these procedures. You understand that failure to enable remote access to your Device may cause the Services to stop working, preventing you from participating in Competitions or receiving other Services.

We will have access to your Device solely for the following purposes:

- a) Providing support
- b) Updating the Services
- c) Determining your location for regulatory purposes only. Such access is subject to the terms of our Privacy Policy.

2.3 Beta Releases

If a Service is identified by us as a "beta" version ("Beta Service"), you acknowledge and agree that it may contain more or fewer features than the final release of the Service. We reserve the right to not release a final version of a Beta Service or to modify its features, specifications, capabilities, functions, licensing terms, release dates, general availability, or other characteristics, in our sole discretion. Beta Services may not be suitable for production use, and may contain errors that affect their proper operation and functionality. You understand and agree that Gaming Arcade will not be held responsible for any damages, including any losses arising from the failure of any Beta Service.

2.4 Third Party Sites

The Services or Site may provide access to third-party websites or services. We do not have any responsibility for third-party websites, services, or content available through those third-party services. You are entirely responsible for your interactions with third parties, including advertisers. Your use of third-party software, websites, or services may be subject to that third-party's terms and conditions and privacy policy.

3. Compliance With Laws

3.1 Prohibited US States/Countries

You understand that there are specific laws, rules, and regulations governing sweepstakes, contests, and tournaments involving entry fees and prizes, known as "Gaming Laws," which are established by each US state, country, territory, or jurisdiction

As a result, Token Competitions are not available to users in any jurisdiction where such Competitions would be in violation of the Gaming Laws ("Prohibited Jurisdiction"), and you may not participate in Token Competitions if you are in any Prohibited Jurisdiction. In the United States, Prohibited Jurisdiction includes Arizona, Arkansas, Connecticut, Delaware, Louisiana, Montana, New Mexico, South Carolina, South Dakota, and Tennessee, and for card games, Prohibited Jurisdictions include Maine and Indiana.

It is your responsibility to determine whether the state, country, territory or jurisdiction in which you are located is a Prohibited Jurisdiction. We reserve the right, although not obligated, to monitor your location while accessing our Services and block access from any Prohibited Jurisdiction.

3.2 Additional Laws

Along with Gaming Laws, you must comply with all city, state, and federal laws, rules, and regulations applicable to your location and use of Services, including but not limited to U.S. securities laws, commodities laws, money transmission regulations, and sanction and export laws (collectively referred to as "Applicable Laws"). It is your responsibility to abide by all Applicable Laws. Note that certain jurisdictions may not allow some or all of the Competitions, and may not be lawful for some or all residents or individuals present in those jurisdictions.

COMPETITIONS AND SERVICES MAY BE VOID OR RESTRICTED IN CERTAIN JURISDICTION BY APPLICABLE LAWS, AND YOUR PARTICIPATION IN COMPETITIONS IS SOLELY AT YOUR OWN RISK. WE ARE NOT RESPONSIBLE OR LIABLE IF YOUR ACCESS TO PARTICIPATION IS RESTRICTED OR PROHIBITED BY APPLICABLE LAWS. WE DO NOT PROVIDE ANY REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED, AS TO THE LEGALITY OF YOUR USE OF SERVICES OR PARTICIPATION IN ANY COMPETITION, AND NO PERSON AFFILIATED WITH US HAS THE AUTHORITY TO MAKE SUCH REPRESENTATIONS OR WARRANTIES.

4. Representation, Warranties & Participation Risks

4.1 Potential Regulatory Consequences in Various Jurisdictions

You acknowledge that the Services may be affected by regulatory inquiries or regulatory actions, which may prevent or restrict our ability to continue developing or providing some or all of the Services in your jurisdiction, or prevent or restrict your ability to access or use the Services. By using the Services, you agree that we will not be held responsible for any such events, except in cases where we are required by applicable law to refund you.

4.1 Authority: Adherence to Legal Obligations

You are making a declaration and guarantee to us that

- a. You affirm that you possess the rightful authority and capability to accept these Terms and participate in the Competitions you sign up for.
- b. You agree to adhere to these Terms while participating in Competitions, receiving, or utilizing Services.

5. Privacy

5.1.

We value your privacy and have implemented policies to safeguard it while you use the Site, participate in Competitions or use the Services. Our Privacy Policy is incorporated into these Terms and outlines these policies in detail. We handle all the information you provide to us in accordance with the Privacy Policy, including information submitted to the Site and information submitted for participation in Services. Please take the time to carefully read the Privacy Policy.

5.2.

Accessing and using the Services necessitates an internet connection to our servers, and to enable the Services, we may require specific information from you and your internet-enabled Device. Such information may include internet connection data and other data related to the operation of the Service from any Device that uses your wallet to log onto the Service. We will use this information in accordance with our Privacy Policy.

6. Referral Program

6.1 Referral Commission

Gaming Arcade shall provide you a commission for referrals made by you ("Referral Commission") as specified in Gaming Arcade's Referral Program, subject to the terms and conditions laid out in the Referral Program.

6.2 Prohibition on Self-Play

Gaming Arcade has the sole discretion to determine whether any user's wallet was created directly by you or was created to falsely generate or enhance Referral Commission, and such wallets will not be included in the Referral Commission or Referral Program.

6.3 Taxes

You are obligated to pay any and all taxes, duties, tariffs, or assessments that may arise from the payment of the Referral Commission as described in these Terms and the Referral Program.

7. Indemnification By Us

At your own expense, you agree to indemnify and hold us, our directors, officers, employees, and agents free from any and all claims, disputes, liabilities, judgments, settlements, actions, debts or rights of action, losses of any kind, and all costs and fees, including reasonable legal and attorney's fees that may arise in connection with or related to:

a. If you violate these Terms;

b. The violation or failure to meet any of the promises, guarantees, or obligations made by you in these Terms;

c. Any use of the wallet, Site, and Services by you or any other person;

d. If you provide false, incomplete, or misleading information (including information about your citizenship, residency, or nationality); and/or

e. If you engage in negligence, fraud, or misconduct, you are responsible for indemnifying us and our directors, officers, employees, and agents from any claims, disputes, liabilities, judgments, settlements, actions, debts or rights of action, losses, costs, and fees, including legal and attorney's fees.

Zelta Labs LLC reserves the right to take exclusive control and defense of any such matter at your expense, and you agree to assist in our defense. You may not settle any matter without our written approval. Zelta Labs LLC will make reasonable efforts to inform you of any claims, actions, or proceedings when we become aware of them.

8. Proprietary Rights

8.1 License of Services

Except for third-party software integrated into the Software or Service, Gaming Arcade owns all the technology, content, and other materials used, displayed, or provided in connection with the Services, including any intellectual property rights associated with them. Gaming Arcade grants you a limited, non-transferable, and revocable license to access and use the proprietary portions of the Services.

8.2 Trademarks

The names, logos, and marks of Gaming Arcade's products or services, which are used on the Site or as part of the Service, including Gaming Arcade's name and logo, are trademarks that belong to Gaming Arcade, its affiliates or its respective licensors. Without Gaming Arcade's (or the applicable licensor's) prior written consent, you may not copy, imitate, or use them.

8.3 User Content

Except for third-party software integrated into the Software or Service, Gaming Arcade owns all the technology, content, and other materials used, displayed, or provided in connection with the Services, including any intellectual property rights associated with them. Gaming Arcade grants you a limited, non-transferable, and revocable license to access and use the proprietary portions of the Services.

9. Policy For Appropriate Use

9.1 Code of Conduct

As a user of our Services, it is your responsibility to use the Services in a lawful and respectful manner, and you must comply with our rules of conduct as outlined below. We reserve the right to temporarily or permanently ban any user's wallet and IP address for violating these rules or for abusing email communication, support communication, or the community purpose of any message board areas, as determined solely by us.

To maintain your privacy and security, refrain from sharing personal details such as your name, phone number, home address, and password with other users.

Avoid sharing or posting any materials that are protected by copyright or trademark laws.

Any information you choose to disclose in chat rooms, message boards, or via electronic message may be revealed to the public, and we are not responsible for any such information you disclose.

Engaging in fraudulent activities in relation to any Service is prohibited.

Attempting to impersonate or deceive another user with the intention of fraudulently obtaining private keys, passwords, wallet information, or any other sensitive data is strictly prohibited ("scamming").

Using any information provided on the Website or through the Services for commercial purposes or for the benefit of a business is strictly prohibited.

9.2 User Content

By using the Service, you agree that user content and communications are the responsibility of the users and we do not pre-screen or control them. We are not liable for any user content or communication and do not endorse them. We reserve the right to terminate your access to public forums and delete or edit content submitted publicly, for any reason and without notice. You may only upload, send or receive messages and materials related to the subject matter of the public forums, comply with Applicable Law and any additional terms of service we post in the public forums. You may not upload, distribute or publish any content, information or material that:

a. Uploading, distributing, or publishing any content, information, or material that violates or infringes the copyrights, patents, trademarks, service marks, trade secrets, or other proprietary rights of any person is strictly prohibited.

b. Posting or transmitting content that is libelous, threatening, defamatory, obscene, indecent, pornographic, or has the potential to cause civil or criminal liability under U.S. or international law is strictly prohibited.

c. Any harmful code or properties, such as bugs, viruses, worms, trap doors, or Trojan horses, are prohibited. User submissions and opinions are their own and may not represent the opinions of the platform. The platform reserves the right to edit, refuse to post, or remove any information or materials at its discretion. Users must provide accurate information and not mislead the platform or third parties regarding the origin of their submissions or content. The platform may remove or edit user submissions or content, but it is not obligated to do so.

9.2 Cheating, Fraud and Abuse

By accessing or participating in the Services, you warrant and guarantee to us that you will refrain from engaging in any activity that disrupts or seeks to interrupt the operation of the Services. You understand that engaging in activities that we deem to be unfair practices, which include but are not limited to using unauthorized or altered hardware or software such as bots, bot nets, and colluding with bots, intentionally playing poorly to gain an advantage in certain games, colluding with other players, posting offensive material, laundering money, harassing other participants, breaching the security of your wallet, or any other act (whether automated or not) that unfairly alters your chances of winning or constitutes fraudulent behavior (collectively referred to as "Abuse"), will not be tolerated. If you engage in or participate in such activities, or exhibit such behavior, we reserve the right to take immediate disciplinary action (at our sole discretion), which may include, but is not limited to:

- a. Your wallet may be terminated and your IP address may be blocked, preventing you from accessing the Site and Services.
- b. Any winnings that you might have been entitled to will be nullified and forfeited; and
- c. if you receive any winnings, they may be subject to disgorgement and/or recoupment. Additionally, we reserve the right to report any money laundering or other illegal activities to the appropriate law enforcement and regulatory authorities. We may take legal action, such as seeking injunctive relief, civil and/or criminal proceedings against you and/or any co-conspirators involved in any acts of Abuse. We reserve the right to recover all expenses, including reasonable attorney fees, incurred during such legal actions.

9.3 Policy on Data Security and Unauthorized Access

Any attempt to gain unauthorized access to our systems, interfere with the performance or operation of the Services or Website, or intentionally damage or undermine the Services may lead to civil and/or criminal prosecution. Such actions may result in immediate termination of your wallet and IP address, and forfeiture of your winnings. You understand that we are not liable for any harm, loss, or injury arising from any unauthorized access, hacking, tampering, or misuse of the Services or your wallet.

9.4 Limitations and Prohibitions

Using, reproducing, or redistributing the Service, related products or services in a manner not explicitly permitted by these Terms is strictly forbidden. You are prohibited from engaging in or aiding others in activities that may harm or interfere with our property, which includes, but is not limited to:

You may not copy, distribute, display, transmit, frame, link, host, perform, publish, reproduce, cache, license, or create derivative works based on any information, products, or services obtained from us;

Any effort to gain unauthorized access to the Service or third-party wallets.

Offering unauthorized methods for others to access or use the Services.

Preventing other parties from using or enjoying the Services or the Site is not allowed

Performing actions that create an unreasonable or disproportionately large burden on our or our supplier's network infrastructure, or that could harm, disable, overload, or otherwise affect the performance of our Site or Services

10. Liability Restrictions

10.1

To the fullest extent permitted by applicable law, we and our suppliers or licensors will not be held liable for any indirect, special, punitive, consequential (including, without limitation, loss of profits, data, or goodwill), or incidental damages that may arise in connection with these terms, the website, or any information, services, products, or software that is made available or accessible to you, whether based on contract, warranty, negligence, strict liability, or any other tort, breach of statutory duty, indemnity, contribution, or otherwise, even if we or our third-part suppliers or licensors have been informed of the possibility of such damages.

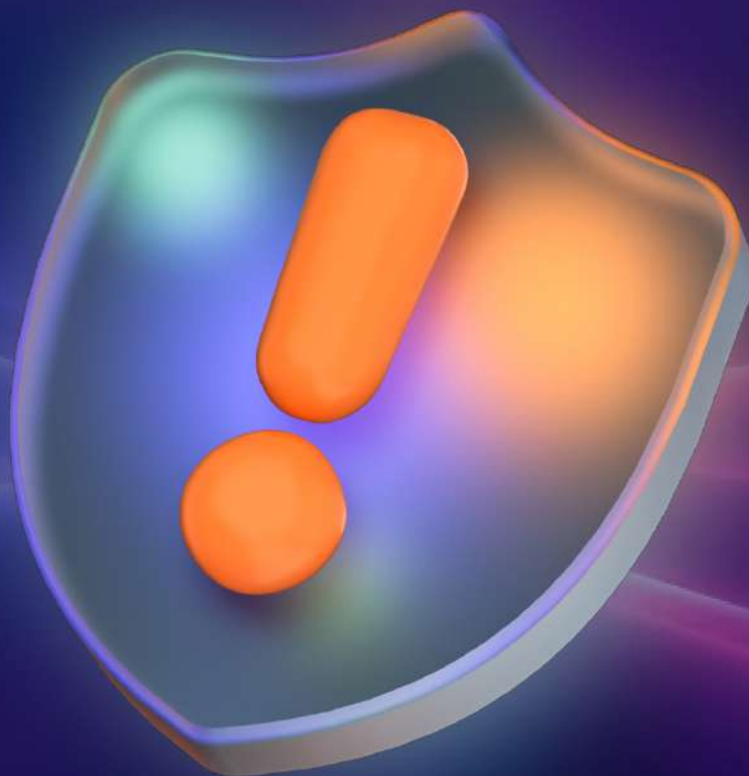

10.2

As far as applicable law allows, the maximum amount of our liability to you that is related to these terms will be limited to us\$50.00. Having one or more claims against us won't increase your liability beyond that limit. Our suppliers or licensors will have no liability for our products, information, or services in any event.

11. Disclaimer

Subject to the extent permitted under applicable law, we provide all services, products, and information “as is”, without any express or implied warranties, including but not limited to implied warranties of merchantability. Fitness for a particular purpose, or non-infringement. You assume all risks associated with the use of these services, products, and information. We do not make any warranties, representation, or guarantees that the services, virtual goods, and/or the site will be secure, free of viruses, uninterrupted, or error-free. We do not guarantee that these services will function properly in conjunction with any third-party components, technology, hardware, software, or system.

12. Amendment

These Terms may be changed by Gaming Arcade at any time, and a notice of the modifications will be posted on the page. By continuing to use the Service after the changes become effective, you agree to the updated terms. If you do not agree to the modified terms, you should discontinue your use of the Services.
